PLANS FOR BRIDGE ACCEPTED

Bids Being Received for Railroad Bridge over Haverhill Street Plans Having Been Approved by State, Town, and County. Work to Begin Early in August.

At a conference held last Friday, July 8, at the office of the County Commissioners in Salem, plans for the new railroad bridge over Haverhill street were presented by officials of the Boston & Maine Railroad and found acceptable by the representatives of the State, County, and Town.

The abutments of the bridge will be forty feet apart allowing for two eight-foot sidewalks and a twenty-four-foot roadway. Bids have been asked for and it is expected that work will begin about August first.

Board of Public Works Plans Highway Reconstruction

The Board of Public Works at a meeting recently voted to reconstruct Barnard street from Main street to Bartlett street. The board voted to expend \$3000 of its appropriation, to be used for the reconstruction of certain sidewalks in town where necessary. Plans were made to reconstruct Harding and Chestnut streets this month. Work on these two streets will be carried on at the same time.

Arrangements are now being made with the Boston & Maine railroad whereby the railroad will pay its share in the reconstruction of the street in the rear of the station. The railroad has already assured the town of \$1,000 to be expended in the filling in of the space under two wooden bridges over the abandoned Haggatt's Pond division of the railroad. The railroad is no longer obliged to keep these bridges in repair and it is estimated that this sum will cover the complete cost of filling in.

Dramatic Club Enjoys Outing

The St. Augustine's Dramatic club went on an outing Sunday to Nantasket Beach. The trip was made in Morrissey's bus to Rowe's Wharf in Boston where the party took the Nantasket steamer to the beach. Although the weather was unpleasant, a most enjoyable day was spent by the members of the party. A basket lunch was enjoyed.

The members of the party included Misses Anna Cronin, Dorothy McCarthy, Katherine Connor, Helen Carroll, Angelina McCarthy, Margaret Sullivan, Katherine Milne, Mary Connolly, Nellie Sullivan, Betty Winters, Mary Carroll, Alice Nelligan, Anna Hennessey, Eva Bourassa, Anna Leary, Hazel Polgreen, Mrs. Robert Franz, Robert Franz, Jr., Rev. Charles A. Branton, O. S. A., Rev. Charles A. Grady, O. S. A., John Alexander, James Dyer, Charles Murray, Henry Schultz, Edward McCabe, John Robertson, William Green, and James McLaughlin.

New Fire Alarm Box

The fire department installed a new box on Salem street last Friday morning. The number of the new box is 356 and it has been placed opposite the residence of Frederick E. Newton.

MAKES HEROIC RESCUE

Cornelius A. Wood Leaps Into Swift Water of Cantapisset Channel as Wife is Borne Out to Sea

Falling from a boat with a disabled motor into the swift current of Cantapisset channel near Cuttyhunk, Mrs. Cornelius Wood was in imminent danger of being borne out to sea when her husband, fully dressed, leaped into the water, and at the peril of his own life saved hers.

On Sunday, July 10, about six in the afternoon, Mr. and Mrs. Cornelius A. Wood and party were returning to Cuttyhunk Island in their twenty-two foot catboat "Garret" when the motor broke down. The channel of Cantapisset is narrow, rock-bound and swift. When the motor broke the boat immediately heeled for the rocks but Mr. Wood quickly averted this danger by dropping the anchor overboard. The anchor held, and it looked as though disaster were averted, but just at that moment Mrs. Wood, who had clambered forward to help her husband with the ropes, missed her footing on the slippery deck and fell overboard, the swift current carrying her under the boat. She had hardly reached the water when Mr. Wood jumped quickly into the water after her. He pulled her to the surface and tried to swim towards the boat. Mr. and Mrs. Wood were both burdened with their clothes and shoes, Mrs. Wood having on a heavy coat. The current was so swift that the couple in the water started to drift out to sea. Unfortunately nobody on the boat knew how to manage it or sail it.

Just as Mr. and Mrs. Wood drifted by the boat, one of their friends reached out and caught Mrs. Wood by the coat collar and the other members of the party helped to pull her on board. Because Mr. Wood was swimming against the current with Mrs. Wood in his arms, there was delay enough in passing the boat for those on board to catch hold. Without doubt, he saved her life at the risk of his own.

Tyler Rubber Company Puts on Night Shift

The Tyler Rubber Co. has put on a night shift on rubber bands, and the mill room is also working overtime due to recent orders.

John Sullivan of Malden has been promoted to foreman of the footwear cutting department.

Deaths

July 11, 1927, Annie Polgreen, wife of Aubrey Polgreen, of 39 Washington avenue, aged 54 years.

July 8, 1927 at the O'Donnell sanitarium, Ballardvale, Jane Smith, aged 64 years.

July 10, 1927, Emma Thayer Carter, wife of William H. Carter of South Main street, aged 53 years, 8 months, and 22 days.

LOCAL NEWS NOTES

Miss Charlotte Collins of Summer street is visiting in New York.

Mr. and Mrs. Louis M. Huntress are at Osterville for the summer.

Dr. Thomas Kyle of Elm street is spending a few days in the White Mountains.

Mr. and Mrs. Arthur Swenson of New Jersey are visiting relatives in town.

Michael J. Cashman, driver for the American Express is enjoying his annual vacation.

Miss Leona Barnes of Boston is visiting her aunt, Mrs. J. A. Barnes of Chestnut street.

Agnes Buss of Essex street recently had her tonsils removed at the Lawrence General Hospital.

Miss Florence Gilman, local telephone operator is enjoying her annual two weeks' vacation.

Ralph Baker, driver of Ladder 1 at the Central Fire station, is enjoying a two weeks' vacation.

Miss Mary Daley of Higgins Court has returned from her two weeks' vacation at Salisbury Beach.

Miss Helene Brady of Boston spent Tuesday with her parents, Mr. and Mrs. Patrick Brady of Elm court.

Francis Kelly of Bartlett street, popular clerk at the J. H. Campion store is enjoying his annual two weeks' vacation.

Charles O'Neil of Essex street has returned from Salisbury Beach where he has been spending his ten days' vacation.

Mrs. Margaret C. Scott and daughter, Margaret W. Scott, of 7 Arundel street are at Newfields, N. H., for the summer.

John Buss who has been traveling on the Keith circuit since last fall has left for Baltimore after visiting his family at their home on Essex street.

Mr. and Mrs. James Stewart recently returned to Omaha, Nebraska, after a visit with the former's father, James Stewart of 3 Moraine street.

Mrs. Margaret Murphy, who was recently operated on at the O'Donnell Sanitarium at Ballardvale, returned to her home on Main street today.

Miss Agnes O'Connell, local telephone operator, has returned after spending two weeks with her sister, Mrs. Walter McCarthy in the White Mountains.

Mr. and Mrs. Henry Kenneally of Elm court are rejoicing over the birth of a son born Tuesday morning at the O'Donnell sanitarium in Ballardvale.

Mr. and Mrs. Walter H. Coleman have returned to their home on Chestnut street after an extended automobile tour which included Massachusetts, Vermont and Connecticut.

The house at 71 School street owned by the Piddington estate has been purchased by Clarence Smalley. The sale was made by George A. Christie, Rogers Agency, Musgrove building.

Rev. Charles Hart, O. S. A., assistant pastor at St. Rita's church in Philadelphia, is spending his annual two weeks' vacation with his parents Mr. and Mrs. Daniel Hart of High street.

Mrs. Harvey McCrone and daughter, Natalie, have returned to their home in Watertown, Conn., after visiting Mrs. McCrone's parents, Mr. and Mrs. Walter H. Coleman of Chestnut street. Miss Ethel Coleman will visit her grandparents for the remainder of the summer.

Alpie Toroci of 362 Essex street, Lawrence, who appeared before Judge Stone in Andover police court on Wednesday afternoon, was found guilty of driving an automobile without a license and was fined \$50.00. It was he who earlier in the week drove into the fence at Stimpson's bridge. It is alleged that he can neither read nor write, and that a friend took the examination for a license in his place. When this was found out, the license was revoked and he has since been driving without one.

John Shevlin of Pearson street was given a suspended sentence to the House of Correction after being found guilty of assault on his wife.

DROWNED AT FOSTER'S

Stoneham Boy Loses Life on Saturday Afternoon—Efforts at Resuscitation Prove Unavailing

Arthur Gallagher, 20, of 89 Washington street, Stoneham, died Saturday afternoon at the Lawrence General hospital following a boating accident at Foster's pond.

According to officials of the Andover fire and police departments, Gallagher and his friends, Edgar A. Brunette of 39 Falmouth street, Lawrence, and Warren Bingham of Avon street, Somerville, were in the boat when it overturned. Brunette and Bingham struck out for shore and expected Gallagher, who was a good swimmer, to follow them. Noting that he was missing, they returned to the spot where the boat capsized and soon located the body of their friend on the bottom of the pond. His body was recovered shortly afterwards by his companions who summoned the Andover ambulance. Artificial methods of resuscitation were resorted to when the body was brought ashore and ambulance attendants worked over the lad all during the journey to the hospital but he died within two hours after his arrival at the hospital. Medical Examiner Dr. Victor A. Reed pronounced death due to accidental drowning.

Young Gallagher had been working on the Stoneham Press with his older brother, Frank J. Gallagher, Globe correspondent at Stoneham. He was graduated from Stoneham High School a year ago.

He leaves his mother, Mrs. Annie Gallagher; four brothers, James H., Frank J., John H. and George L. Gallagher, and two sisters, Ellen C. and Mary E. Gallagher of the Globe editorial staff.

Mrs. Rogers Has Busy Afternoon at Town Hall

Congressman Edith House Rogers was busy every minute between the hours of 3:15 and 5:00 o'clock on Tuesday afternoon when she met her Andover constituents at the Town Hall.

Questions were asked about matters of legislation, immigration, compensation for ex-service men, pensions for their dependents and many other matters.

With regard to a new location for the Andover post office, there was no news more recent than that in the letter from John H. Bartlett, First Assistant Postmaster General to Mrs. Rogers published in the Townsman of April 1. Andover will have a new federal building eventually but it will require the continued efforts of her Representative backed by her citizens to make it a reality.

The renewal of the lease of the present quarters for a period of ten years is no cause for discouragement, said Mrs. Rogers, as with proper notice to the lessors, it would be possible to break the lease if more suitable quarters were provided.

Mrs. Rogers Has Busy Afternoon at Town Hall

The four or five hundred citizens who visited and admired the new Memorial hall at the informal opening on last Friday evening went away and apparently to their friends the good news so that on Saturday there were nearly as many visitors as on the previous evening.

The beauty of the rooms on the opening night was enhanced by the gifts of flowers; tiger lilies in the reference room, roses and lilies in the reading room, and different varieties of yellow flowers in the children's room.

Members of the library staff were in attendance to point out the alterations and improvements so that none of the excellencies of the building should be missed. Miss Edna Donald, Miss Agatha Wade, and Miss Margaret Manning were assisted by Miss Margaret Underhill, Mr. and Mrs. Thaxter Eaton, Miss Delight Hall and Miss Ethel Brown. Two of the trustees, Dr. Claude M. Fuess and John C. Angus also acted as hosts for part of the evening.

Among those present were Selectmen Frank H. Hardy, and Andrew McTernan, Town Clerk George A. Higgins, Rev. Alfred C. Church, Dr. E. Victor Bigelow, Rev. Charles W. Henry, Rev. C. Norman Bartlett, Mrs. Joseph W. Smith and Miss Mary Myers Smith.

During the week great progress has been made in getting books out of storage and many new names have been added to the list of borrowers at the library. More lights have been added, notably the one in the cupola. The suggestion has been made that this light burn perpetually as a memorial to Andover's soldier dead, as the light is kept burning on the grave of the unknown soldier in Washington.

A recent gift is that from Miss Alice Jenkins of the contemporary record of subscribers to the original memorial hall kept by her father E. Kendall Jenkins, for fifty years a member of the board of trustees.

The following comments were overheard at the opening on last Friday night:

I can't believe that this is Andover. I wouldn't have believed this was the same place.

Can you really walk on this glass floor? Did you ever see anything so cute as the children's room?

The first beautiful civic building in Andover!

Don't miss those little study alcoves. I don't begrudge one cent of those extra taxes.

I'm not educated up to the outside of this building but I'm sold on the inside.

It seems as though this must be some other town.

It'll be so much easier to use the books now.

I never was in a place that welcomed you so. I guess now says "Come and stay!"

Well, I know now we'll hear less about ninety thousand dollars' worth.

The people who won't use this library haven't any right to criticize it.

I'm so happy about this place I feel like praying!

Just think what it means to the town to own such a spot of beauty!

Before this all the fine buildings in town belonged to Phillips Academy. I can't get over it—that this is ours.

Calcium and phosphorus, two elements likely to be lacking in the average dairy ration, are important bone builders, says the United States Department of Agriculture. Feeds that furnish a considerable amount of calcium are properly cured legume hays. Cowpea hay ranks first in calcium content, but alfalfa, soybean, and red clover hays are close seconds. Any of these hays, if well cured and fed in liberal quantities, will furnish the calcium needed by dairy cows. Phosphorus can best be supplied by feeding considerable amounts of wheat bran, cottonseed meal, soybean meal, or linseed oil meal in the grain ration.

The population of Canada is about equally divided between city dwellers and country dwellers. The total urban population is given as 4,352,773 and the total rural population 4,435,710. In Prince Edward Island and Saskatchewan the rural population runs about seventy-five per cent of the whole.

Might of Alexander Made World History

Alexander the Great was one of the pivotal figures about which turned the history of the world! His conquests, extending eastward to the other side of India, taking in Asia Minor, Egypt, Palestine, Syria, Mesopotamia, Arabia, Persia in its sweep, left Greek garisons and Greek commanders in every city or place of importance.

Greek became a universal language, so firmly entrenched that it successfully resisted the Latin tongue of the Romans when they in turn over-ran much of the world. Alexander made his own, before he sat down to weep because there were no more worlds to conquer! The Greek philosophy of Socrates, Plato and Aristotle, glorifying truth and seeking for a guide to absolute knowledge of the world that directs the universe became known everywhere. Thus was bred the formulative in words of a desire Christianity was designed to meet—the desire of all men, whether they realized it or not. Thus was spread the one common language of literature and science by which Christianity could express itself, and in which it could write its Gospels of a new Covenant or Testament.

Pat Biblical Quotation

A report published in London that Kansas regulates by law the size of sheets in hotel beds has brought forth a rather charming anecdote concerning the famous Lord Kelvin. More than 50 years ago he was engaged in refitting his yacht, *Lalla Rookh*, and entrusted the purchase of bed linen to the wife of a professor in Edinburgh university. Kelvin wrote her: "The area for mattresses is approximately rectangular, three feet nine inches by seven feet. In fixing the size of sheet I would wish to avoid an error, which seems to have originated in the Levant prior to 725 B. C. (Isalah 28:20, second clause of the verse) and which is still deplorably prevalent at sea." The verse in question reads: "For the bed is shorter than a man can stretch himself on it; and the covering narrower than he can wrap himself in it."—Christian Science Monitor.

Clowns Long-Lived

Records prove that most clowns live to a ripe old age. Dan Rice died in Long Branch, N. J., in 1892, at the age of eighty-four. He preserved his mentality and cheerfulness to the end. George L. Fox lived to seventy-nine years of age, and appeared professionally until he was seventy-five. Pete Conklin, the Shakespearean clown, retained his activity, almost to the day of his death, which came on his eighty-first birthday. Tony De nler died at the ripe old age of eighty-two. He passed his last days in penury and poverty in the almshouse in Kingston, N. Y.—From "Here We Are Again," by Bob Sherwood.

Aluminum Castings

Aluminum casting alloys are said to consist most frequently of aluminum, zinc and copper in varying proportions. Everything depends on the purpose for which the casting is to be used and the qualities that are desired. In automobile work, castings containing 7 to 8 per cent of copper, or 15 per cent of zinc and 2 to 3 per cent of copper, are largely employed. Other metals such as nickel, iron, manganese, chromium, magnesium, etc., are also added to aluminum for castings.

Suggestions for Soldering

Do not attempt a soldering job until the iron has been properly "tinned," otherwise difficulty will be encountered in trying to make the solder stick to the iron. See that all wires to be soldered are perfectly clean, otherwise the solder will fail to stick properly. If necessary, clean the parts to be soldered with fine sand paper, not emery paper. When making ground connections to the water pipe, be sure the pipe is free from dust or corrosion and the iron good and hot.

The Business Cycle

"A study of the business cycle makes one especially optimistic about sections of the country which are now suffering from the depreciated farmers' dollar. The time for farmers to become pessimistic is when business is booming and not at such a time as this. The very fact that conditions are unsatisfactory in certain sections today is the best evidence that prosperity is ahead for these same sections because it is always darkest just before dawn. From a statistical study I had rather buy business real estate today in certain cities of the Central West where business is very poor than in the very prosperous cities where prices are high. The cycle of business is always operating, differing of course with different sections, commodities and industries. The great opportunities for profit are in connection with those communities, commodities, and industries which are temporarily depressed. Surely those who hold property in such depressed sections would make a great mistake to sell while conditions continue bad.

Making Co-operative Marketing Work

"I believe in co-operation. The success of large units is the best evidence of the importance of co-operation. Unfortunately thus far co-operation has been most effective through actual consolidation and a common stock ownership. Co-operation through common stock ownership is responsible today for the success of the Standard Oil

YOUR BOY'S BUSINESS

CENTRAL WEST IMPROVING

Babson Believes Tenant Farmers Responsible for Troubles

Babson Park, Massachusetts, July 13, 1927. Roger W. Babson has just returned from a three-weeks' trip through the Central West. He has traveled in Ohio, Indiana, Illinois, Iowa, Nebraska, Missouri, Tennessee, Kentucky, Georgia, and the Carolinas. He found business in Iowa and adjoining territory still very quiet; but believes this is only a temporary condition. His complete statement is as follows:

"There are sections of the Central West which have been hard hit. Prices of land during the war went to higher figures than farmers could afford to pay for wheat or corn production. Hence speculators and those who bought on mortgage are seriously embarrassed. It also is questionable whether many farmers are earning more than in other parts of the country. Especially so during the war when the young people see this and hence for some years have been leaving the farms. Moreover, the entire farming problem of the Central Western States is complicated by the fact that wheat, corn, and some of its other products are subject to a different economic law than applies to most communities. For instance, the higher the standard of living throughout the United States the more green vegetables, dairy products, better meat cuts, and fruits are consumed. This however, is not true in the case of wheat, corn and certain other products. The less wheat and corn they use per capita, this eliminates the possibility of increasing the per capita consumption of these commodities by increasing the nation's standard of living. This is a very fundamental fact. Especially so in the case of political leaders seldom mention it. It is, however, with this thought in mind that I make the following statement.

Farms Very Essential to Nation's Welfare

"Notwithstanding the above economic fact, everyone realizes that farms are absolutely essential to the nation's life, prosperity and welfare. There are three reasons for this:

"(1) The nation is absolutely dependent on the farms for food as food is the requisite of life. Clothing and shelter are restricted and varied by moving to other climates, but wheat and corn are absolutely essential to life and if the farmers should strike, as have some other groups of workers, the cities of the world would be powerless and at their mercy.

"(2) The farmers of the nation are the greatest factor in the country's spending power. Bankers, manufacturers, and merchants are more dependent on the prosperity of the farmers than upon the prosperity of any other group. The country cannot long continue prosperous without the farmers being prosperous also.

"(3) We are dependent on the farms of the nation for our men. The real institutions of learning in this country are not our colleges and universities but rather the farms and ranches of the West and South. From these the men have come. The farms supply the leading question whether the nation is to be a nation of farmers, or a nation of the trained, given by the farms, in integrity, thrift, and initiative, is invaluable to the nation. For this reason alone, if for no other, the farmers are entitled to all effective aid that can be given. It is, however, a question whether the nation has properly analyzed their difficulties and are going about the solution in an effective manner.

Kind Words and Plasters No Good

"Manufacturing and labor leaders are receiving government aid because they have intelligently sought and worked for it. Industry and labor in the East have impartially studied their situation, consulted and taken the advice of others and have not called for advice 'nonsense' when it has been honestly given. Therefore today both manufacturers and wage workers are organized in an effective manner so as to get results. The manufacturers recognized that they needed a tariff and the labor leaders recognized that they needed immigration restriction. The farmers have tried different quick remedies, and have made an honest attempt at co-operation; but without the desired success.

"Today the young people are leaving the farms for the cities where they can engage in the industry protected by the tariff, or work at a trade protected by labor unions and immigration laws. This makes it necessary for the parents who own farms and wish to retire to lease to someone although farms should not be leased. The tenant farmer is the result of the troubles of the Central West and other sections of the United States which are having farm troubles. The only legislation which will do permanent good is legislation which will keep a reasonable and sufficient number of young people on the farms of their parents so as to make leasing unwise except in rare instances. Personally, I believe this will be done. Then as the percentage of farms operated by the owners increases and the percentage of leased farms decreases, agricultural conditions will improve. Only a little improvement is necessary because farming has many advantages not possessed by industry. A sensible man is willing to make less if he can live on a farm; but he must own the farm and be sure that some tenant neighbor is not cutting his throat.

How to British Mace

The reason why members of the British house of commons literally bow to the mace is because parliament at one time assembled in St. Stephen's chapel, London. The members used to bow to the cross on the altar. Here also the mace was kept and when parliament moved to its own quarters members still bowed to the mace as a symbol of the cross.

Wise Learn From Errors

The man or woman who "never made a mistake in their lives" never lived. Humans will never reach perfection, strive as hard as they may. Those who come nearest will be men and women who learn from errors how to avoid mistakes in the future.

THE ANDOVER TOWNSMAN
Looking Back Twenty-five Years

W. H. Higgins' barge conveyed the Unitarians of North Andover on their picnic Wednesday.

Miss Clara R. Boynton of Nashville, Tenn., is spending her vacation with Mrs. J. H. Merrill, 17 Salem street.

Miss Mary F. Mason of Park street has returned from Swampscott, where she has been visiting her sister, Mrs. Charles W. Tucker.

Miss Lucia G. Merrill has returned from Ventnor where she has been spending three weeks at the seaside with her sister, Mrs. Wilson.

Alexander Dundas, who is employed at the American Woolen company's mill in Moosup, Conn., has been spending a few days at his home in town.

In North Andover, the new postal arrangements have gone into effect. Besides the three letter boxes, the government has put in three large standing boxes as a receptacle for papers and parcels. Andover should have something of that sort about town.

Work was begun on laying the under drain on the westerly side of Main street last Saturday. Superintendent Lovejoy is assisted in the work by George Guthrie and Louis White of the Board of Public Works Department. The former has charge of laying the pipes while the latter is giving the grades. The stone work on the culvert over Roger's brook was put in by John McCarthy while the catch basins are being attended to by Twombly of North Andover, who put in the basins on the other side of the street.

Mrs. S. E. Randall is visiting at Holden, N. H.

Miss Lena Lindsay is spending the summer in the White mountains.

Dr. and Mrs. J. F. Richards have gone to Tamworth, N. H., for the summer.

James Marshall of T. A. Holt & Company's store is enjoying a ten-days' vacation.

Mr. and Mrs. Ernest Luce have returned to Andover from their wedding journey.

William Marland and family left town Wednesday for their new home in Griffin, Georgia.

Miss Alice Leslie, bookkeeper for W. H. Gile & Co., is spending her vacation at York Beach, Maine.

Mrs. David Lindsay and daughter, Flora, left town Wednesday for a visit with friends at Geneva, Ohio.

President J. A. Smart of the Merrimack Mutual Insurance company has been in Vermont on business this week.

Desert Vegetation

The Mesquite trees of the southwestern desert arrange themselves to share to the greatest extent the spare moisture of the country. The giant cacti rise in awkward shapes sometimes as high as fifty feet with ghost-like arms extending in various directions and at differing angles. Cholla cacti (pronounced choya) tempt the hungry cattle with succulent green, behind thorns more terrible than those possessed by any other American plant. Yet a single match will ignite the whole dreadful barricade and leave behind wholesome green juicy fodder.

Nests Vary in Shape

The commonest form of nest—that built by robins, musk-throats, and so on—is rather like a basket. The bullfinch is a felt worker. Not content with a mere basket or cradle to contain the eggs and young, the wren, water-wagtail, and tit place a roof overhead, and construct a door at the side through which entrance is obtained. One of the most curious examples of this type of nest is that of the titmouse, which is strangely like a bottle in shape.

Motor Philosophy

One touch of gasoline makes the whole world spin. Give a man a chassis, four tires, a soap box and a horn, and he immediately wants to become the Vanishing American. From that time on, he believes in the survival of the fittest. He has two motives: "Fright makes right," and "The other fellow is always wrong."—American Magazine.

Real Estate Transfers

The following real estate transactions were recorded at the Lawrence registry of deeds during the past week:

Michael Gardner to Lucie L. Hancock, Chestnut street.

Neil C. Nicoll et us to Norman K. MacLeish et us, Shawnee Road.

Fannie S. Smith to Mary Byers Smith, Central street.

Edmond E. Hammond to Betha M. Hammond Chestnut street and Porter road.

Kate Adams Swift to William J. Burns, Main street.

Old Sport Is Fishing
Who discovered fishing? The answer to that particular query is lost in the mists of prehistoric times. The technique in ancient days varied little, it seems, from that of today. On the walls of Egyptian tombs have been discovered crude drawings of fishing scenes, proving that even in the days of the pharaohs fishing was not only an occupation but also a sport. The Egyptians of the lower classes are shown employing the hook and line to land their catch, while sportsmen of the Nile preferred the spear or trident.

Around the Home
By MARGARET BRUCE
W.T.U. Service

Reclaiming Your Rugs
How all the old-fashioned industries and activities have been taken out of the home and turned over to commercial enterprise, haven't they? There is scarcely one of the home activities—whether making new articles or refashioning from scraps and leftovers—that isn't done better, more cheaply, and infinitely more quickly by the modern factory. Of course these machine products do not have the personal, hand-made touch that the helrooms made by our grandmothers possess; but the modern woman has little time in which to make the braided mats, candlewick counterpanes and patchwork quilts produced in the olden days when there was more time than anything else!

The newest form of commercial making-over that I know of is the reclaiming of old carpets, rugs and clothing materials, and turning them into attractive new rugs of any size, dyed to one's chosen color and finished in either a plain solid surface or two-toned with a wide border. We all know how successfully the government reclaimed old uniforms, blankets, army shirts, and other garments during the war, and how entirely clean, sanitary, and durable such reclaimed articles can be.

The firm which reclaims our ragged, faded, and torn carpets, rugs, and portieres—otherwise useless, performs what sounds like a domestic miracle. Into the maw of their special patented process goes the shabby, the worn, and the washed out. There the material is first reduced to shreds,

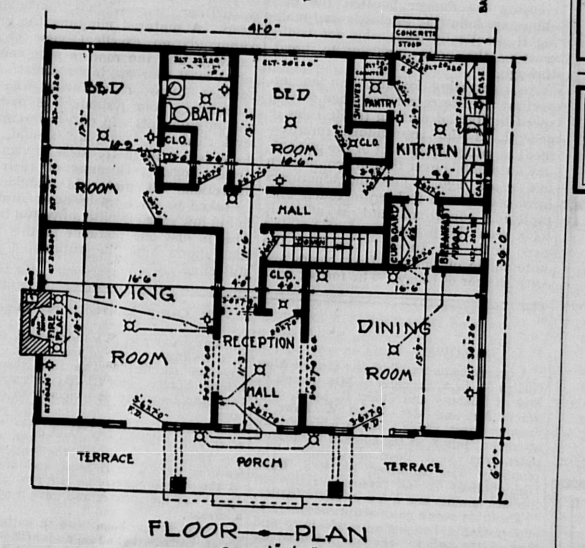

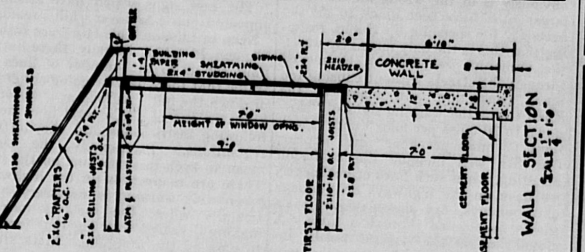

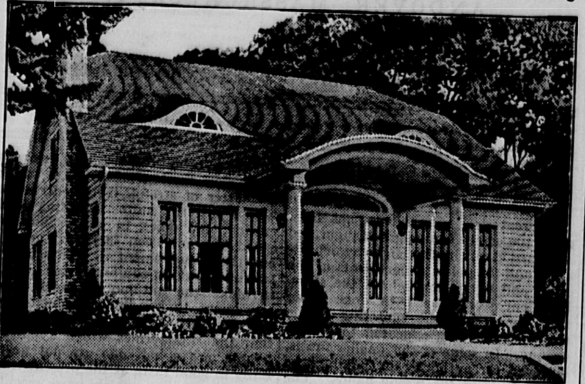

then washed, sterilized, carded, color is schemed, and lastly it is woven into a thick, seamless, reversible rug into which the foot sinks luxuriously.

It seems to me this is a brilliant idea on the part of the manufacturers. How many things we throw away because we are unable to utilize the portions that are still worth keeping! To bundle up all our old coats, ancient parlor carpets, dreary chenille portieres, outgrown couch covers, and ragged pieces of upholstery, and have them return to us in the shape of a handsome taupe or blue rug for the dining room or bedroom—well, it seems like magic and nothing less! The rug comes back within the week, too, and the price is less than you would think.

(Copyright.)

John Wilkes Booth
a Confederate Spy?
Gen. Phil Sheridan always believed that at one time in the Civil war he had in his employment as a spy John Wilkes Booth. He had employed a man named Lomas as a spy, but suspected he was dealing with each of the opposing armies. One day Lomas brought a man to Sheridan and introduced him as Mr. Renfrew, who also wished to serve as a spy. Just then Sheridan wished to have some bridges destroyed and sent the two men out on this mission. He secretly assigned a scout to watch them. Their attempt failed, but they had plausible explanations. They were sent out again after Sheridan had taken pains to let them know there was to be a big fox chase on a certain date in which many of the officers were to take part. It was a ruse to throw the Confederates off their guard when the spies should carry the report to them. At the time mentioned Sheridan had planned to strike hard. The men were shadowed and found to have gone to Confederate headquarters. They were arrested on their way back but escaped. When Sheridan saw pictures of Booth after Lincoln's death, he recognized him as the spy Renfrew.—Kansas City Times.

Bungalow of Pleasing Appearance Makes Good Home for Small Family

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give ADVICE FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 187 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

How many times have you seen a bungalow that seemed to be all roof and entrance? How many people have a decided prejudice against the bungalow because of seeing so many that had just this appearance? In designing the small house, and especially the bungalow, the roof and the entrance are of the utmost importance. They should receive the most careful consideration to assure that they will be thoroughly in harmony and proportion. If this is done the unfortunate effect referred to will be avoided.

Because of its lowness, with the roof close to the level of observation, the bungalow must have its roof properly broken to avoid too great and monotonous an expanse. Notice the house shown in the photograph. Here we see a roof down close to the eye, the full width of the house and running back to the ridge. Here, however, the peaks of the two gable ends have been cut off, two eyebrow windows break into the roof, and the entrance roof, as well, offers a break in the expanse.

While the entrance is large, heaviness has been avoided, and in this way the entrance detail is in no way out of proportion to the house. Because of this treatment of roof and entrance, no observer will feel that this bungalow is all roof and entrance. In fact the whole effect is a particularly pleasing one. With the placing of the central entrance, the two eyebrow windows and the French doors at either side of the entrance, a perfect balance is attained.

Inside this small home, good design is equally apparent. The nearly square space lends itself easily to a compact and efficient floor plan and, as a result, we have within the 36 by 41-foot walls, far more than one might expect.

Entrance is made into a central reception hall from which a passage leads to the rear portion of the house and arched doorways open into the living room and dining room at either side. This living room is of a comfortable size, 10 1/2 by 19 1/2 feet with a fireplace on one side and a group of French windows at the front. The dining room is somewhat smaller, but of ample size, and it, too, has French windows at the front, while side windows in place of the living-room fireplace, makes it bright and cheerful at all times.

To the rear of the dining room there is a passage with built-in cupboard and a breakfast nook connect-

ing the dining room with the kitchen beyond and, at the same time, affording a desirable separation. The small compact kitchen is thoroughly modern in every detail with built-in cases and a pantry where the refrigerator may be installed.

The remainder of the rear portion is occupied by two bedrooms with a bathroom between. These are both rooms of medium size, each with a large closet and with good cross ventilation made possible. These rooms, as well as the kitchen, open off of a rear hallway and from it a stairway leads to the basement below.

Wainscoting Can Be Done in Glazed Colors
Wainscotings are sometimes done with scrumpling or glazed colors. First, there is a wall-paper material on the wainscoting, with variously rough surface, that may be either some geometrical pattern or a plain roughness of some description.

The surface is coated with a certain shade of color, as a pale yellow or tan, and when dry is scrumpled over with a transparent color, say, raw umber, with wiping out here and there, making an antique effect, very rich and distinctive.

In two-color work there are but two colors used, as the name indicates, the first being a ground color, upon which is laid the glaze color. Upon this is dashed the various pure colors desired, using the stippler, a wad and a bit of crumpled paper, over all.

Simple Case for Books Is Latest Convenience
It is quite the thing nowadays to tuck away a set of bookshelves in odd nooks and corners of a living room. On each side of a window or fireplace they are especially cozy-looking. Doors are dispensed with, and the interior of the case is painted with a washable enamel, so that it is kept clean easily.

It is becoming popular to have the interior of the case painted in some bright color, repeating or emphasizing some note in rug or draperies or lampshade. The exterior of the case usually is painted to match the woodwork of the room—cream, white or pale gray.

Use of Stone
The proper use of stone requires careful consideration and study. In selecting stone for the walls of a building three important qualities must be considered; the nature of the stone, its texture and color.

Close Grain Best
Only close-grained woods which do not open under heat and crack the paint provide a proper background for paint and enamel.

TRADE-IN WATCH SALE
You trade in your old automobile, why not your old watch? No matter how old your watch may be, even if it is bent and broken, it has real value while this sale is in progress.
Exchange your old watch for an up-to-date timepiece.

Speed and Safety

A great deal of publicity has been given the safety campaigns inaugurated and carried out by the Highway department and the police departments of the cities and towns throughout the state. Excellent work has been done along these lines and the motoring public gradually is being educated to careful driving. In some of the smaller towns, however, the authority for making laws obviously is in the wrong hands. The larger cities have been quick to see the necessity for speeding up traffic, realizing that this is the only means by which the numerous vehicles can be moved through the streets without causing too much congestion. In many of the small towns the warning signs of "slow down 10 miles per hour" and "speed limit 12 miles per hour" still appear. One can well imagine the confusion resulting, when such lines of vehicles as we have on the highways on Sundays and holidays, are slowed down to a snail's pace going through a town. A closed line is the natural result, increasing the danger because the machines are following so closely and making it practically impossible for traffic crossing the main highway to break through. An interesting feature, and an important one to remember when setting speed limits and making traffic rules in general, is the tremendous improvement in safety equipment of the present-day automobile over that of ten, or even five years ago. The manufacturers have been forced to keep in touch with motoring conditions and as a result have seen the urgent need of keeping pace with the times. Compare the automobile of ten or fifteen years ago with the car of today. The former with its heavy, cumbersome body, slow to start, slow to stop, unwieldy in traffic; the latter of strong, light construction, with a powerful motor, lightning acceleration, and quick to stop. The top speed has not been increased greatly, but the improvement in the acceleration and braking equipment has tended to make the automobile much more convenient to handle and much safer to drive. It is easily seen, therefore, that the traffic rules which applied a decade and a half ago are not necessarily in good taste at the present time. The new signs which have recently appeared on Andover hill reading "Keep in Line on This Hill" are rather vague. If taken literally there is no limit set as to the number of lines of traffic that there may be going either up or down the hill. As long as a motorist keeps in one of the several lines he is following instructions and obeying the regulations. Presumably the signs mean to keep in single line on the hill. There are many hills on the highways where this warning is necessary, particularly where the road is narrow, making it extremely dangerous for cars to pass on the up-grade. Main street is neither narrow nor particularly steep. A motorist climbing the grade commands an excellent view of the roadway, and the road is wide enough for at least four machines abreast. To be sure, there are motorists who use exceedingly poor judgment in passing, not only on hills and curves, but on the level roadway. The law should, and does, deal with the reckless drivers and "road hogs." Because of their indiscretions all motorists should not be asked to drive up or down Andover hill in low speed behind a five-ton truck. This is just one instance in this town that shows how the antiquated ideas still cling.

Weddings

LOWE—BEST

A pretty home wedding was that of Miss Gladys M. Best, daughter of Mrs. Joseph P. Best of Roxbury and Philip R. Lowe, only son of Mr. and Mrs. Albert W. Lowe of Summer street, which took place last Friday afternoon, July 8, at the home of the bride's sister, Mrs. A. A. Boyd of Atlantic. The ceremony was performed by Rev. Isaac Higginbotham in the presence of the immediate families and a few intimate friends. The bride wore a gown of apricot georgette and carried a bouquet of bride roses and lilies of the valley. She was attended by Miss Esther Blanchard of Roxbury, who wore lavender georgette and carried pink sweet peas. The best man was Edward Wells of Melrose. The ceremony was followed by an informal reception after which Mr. and Mrs. Lowe left on an automobile trip to Canada. On their return, they will spend the summer in camp at Martin's pond. The bride is a graduate of the Posse-Nissen school in Boston, and for the last three years has been supervisor of physical education in the public schools of Oswego, New York.

Mr. Lowe is a graduate of Phillips academy in the class of 1915 and of the Lowell Textile school, Class of 1925. He served with the A. E. F. in the World war. He is employed by the Smith & Dove Manufacturing company as a mechanical engineer.

INGALL—COLEMAN

The wedding of Miss Priscilla Coleman, daughter of Mr. and Mrs. Ralph Coleman of Nantucket, formerly of this town, and Ormond Ingall of Nantucket, took place on Sunday, July 3, at Vineyard Haven. The ceremony was performed by Rev. Arthur Papeau of the Episcopal church of that place at 3 o'clock, in the presence of the immediate families of the bride and groom. The bride was attired in orchid georgette with a white satin hat, and she carried sweet peas. Her bridesmaid, Miss Bertha Cuthill of this town was dressed in hoveywood and orchid crepe with a hat to match, and she also carried sweet peas. Roderick Coleman, brother of the bride was best man. Following the ceremony a luncheon was served in the "Ship's Galley" tea room.

After a wedding trip Mr. and Mrs. Ingall will live in Nantucket, where Mr. Ingall is in the Nautican Realty company. The bride's family lived in town for about 18 years. They moved to Nantucket three years ago. While in town Mrs. Ingall was prominent in the Free church Christian Endeavor society and has a great many friends in Andover.

Director Adams Issues Warning to Fishermen

Director William C. Adams of the State Division of Fisheries and Game has issued another warning to all persons who fish without first obtaining a sporting license. Director Adams points out that not only has there been a yearly increase for the past few years of persons convicted for fishing without sporting license but that every day wardens of his Division are prosecuting persons for this offense. This condition continues despite the wide publicity which has been given to the law requiring this license and despite the repeated warnings of Director Adams that his wardens will continue to vigorously enforce this law without fear or favor.

With the vacation season at hand it is highly important that every person who is likely to go fishing during his vacation should provide himself with this license before starting on his trip. There will be no delay in trying to secure a license when the fishing grounds are reached and no "alibi" that it could not be secured. These licenses may be obtained from any town or city clerk in the state and they are good all over the state regardless of where purchased. They cannot be purchased at the State House. Not only is it unlawful to fish without a license but it is also unprofitable. The revenues from licenses have an important bearing in the annual appropriation which is granted to the Division of Fisheries and Game, and anyone who enjoys fishing should be willing to contribute his share towards the maintenance of his sport.

its heavy, cumbersome body, slow to start, slow to stop, unwieldy in traffic; the latter of strong, light construction, with a powerful motor, lightning acceleration, and quick to stop. The top speed has not been increased greatly, but the improvement in the acceleration and braking equipment has tended to make the automobile much more convenient to handle and much safer to drive. Visit Camp Lawrence on Sunday

Camp Lawrence, in its fourteenth season, is in its biggest year of its history. More boys are enrolled at this time than ever before. Sunday, July 10, 700 guests made the trip from Lawrence and vicinity to see the boys. A splendid chicken dinner was served, after which the guests were shown around the campus. Some of the entertaining features were a man hunt and fire drill. At the morning chapel service Prof. Fred L. Day was the speaker and gave a splendid address. Several of the boys were so enthusiastic about Sunday that Sunday their parents arranged for them to stay longer periods than planned. Several fathers signified their intention of going to Camp Lawrence for Father and Son Week August 19, to August 26.

Among the guests at Camp Lawrence Sunday were: Mrs. H. P. Kitchen, Harriet Kitchen, Mrs. M. P. Hall of Shawheen Village; Frank R. Petty, James W. Petty, Mrs. J. Petty, Laura B. Juhlman, Mr. and Mrs. R. E. Hadley of Andover.

Discharged By Court

William P. Foster of Central street appeared in Andover police court on Friday afternoon before Judge Colver J. Stone on a charge of assault on a child, Ernestine Hazelton of Argilla road. According to the testimony in court the Hazelton child with her sister, Lena, Mary Kenna and Mary Sheehy, all of Argilla road, were coming home on Friday afternoon after swimming at Pump's pond. The children took a short cut through the Foster property after Mrs. Homer Foster had told Lena Hazelton and Mary Sheehy that the swimming committee had made a ruling that no children should go through there. Ernestine Hazelton and one of the other girls then went through as they were in a hurry to get home. Foster ran after them, according to testimony, and caught the Hazelton girl. He then took her in his machine to the police station. Foster said in court that a large "no trespassing" sign was posted on the barn. He said that so many children had gone through there that he had made up his mind to make an example of the next one.

The Hazelton child said that her arm where Foster caught hold of her was black and blue. Mrs. Hazelton said that the child required medical attention. Foster was discharged by the court.

Morgan Trio to Tour Europe

The following story clipped from a Paris newspaper is contributed by F. H. Jones of Central street who with Mrs. Jones is spending the summer in travel abroad:

The Morgan Trio, whose Paris headquarters is at 35, rue de Fleurus, will leave Paris soon to play in several summer resorts in France and other European countries. This unique organization, composed of three sisters, Marguerite Morgan, pianist; Frances Morgan, violinist; and Virginia Morgan, harpist, plays, in costume, music of the seventeenth and eighteenth centuries. They are particularly interested at present in French folk music, a peculiarly rich treasury for the exploring musician.

The Morgan Trio appeared Friday night at the gala at the Theatre Champs-Elysees and Thursday night at the home of the French artist, August Artot, where they were the guests of honor. They played for about one hundred guests of the artists. Miss Marguerite Morgan is studying for the third year at the Paris Conservatoire, to which she was admitted as one of the two foreigners who are allowed to attend the Conservatoire each year on prize scholarships. It is a signal honor to win one of these rare scholarships, and her exploit in gaining it is evidence of her musicianship.

Andover Press Defeats Smith & Dove

The Andover Press baseball team defeated the Smith & Dove team 11 to 8 at the Smith & Dove athletic field on Monday night. Jimmy Souter pitched for the winners and Frank Morgan for the losers. Both twirlers performed well on the mound but the Press team bunched their hits in the fifth and sixth innings gaining a lead which Smith & Dove was unable to overcome.

LIBRARY OPEN TO PUBLIC

(Continued from page 1)

Did you see those darling chairs for the children? I never saw so lovely a library. This is a tremendous addition to the town assets. What it will do for the children is worth twice what it cost. Honestly, I haven't words to express what I feel. Those curtains in the children's room get me. It will cost more to run this place but I'll pay my share with a smile. I'm just bursting with pride for Andover. I don't see how they ever did it for so little money! Now the town must fix up these grounds. I don't care what it cost—it's worth every cent. I have been watching the people as they came in and I have seen an interesting thing. This room is beautiful; it is dignified, and it is also very gracious. Every person who entered it has instantly felt at home. Well, we have spent ninety thousand, got our money's worth, and now we have a library that would cost two hundred thousand to replace and isn't excelled by any of its size in the state. That's what I call true town economy.

Committee Arranges Program of Sports

The committee in charge of the sports for the outing to be held on Sunday, July 24, under the auspices of the Holy Name society of St. Augustine's church met in the K. of C. home on Tuesday night and arranged a program of races and other events including a ball game between the married men and the single men. The order of events follows: 100-yard dash open; 50-yard dash for married men over 50; 50-yard dash for single men; three-legged race; potato race; running and standing broad jump, shot-put; golf; pitching quoits to 25 points; fat man's race, and the ball game.

Holt Association of America to Hold Meeting in Andover

Plans are being matured by the local committee for the meeting of the Holt Association of America which will be held in Andover on Wednesday, July 20. Members of the association, who left New York last week, are making a pilgrimage to New Haven and Wallingford and after a short stay in Boston will arrive in Andover next Wednesday morning. They will be joined at this time by members in Andover and its vicinity, the entire party assembling at the residence of John V. Holt, 74 Bartlett street. From this point, automobile trips will be made to points of interest in Andover. Luncheon will be served at the Andover Manse, 109 Main street at one o'clock. The cost will be \$1.50 a plate. All those planning to attend, are asked to notify Mrs. F. H. Kendall, 7 Chestnut street, Andover, Tel. 64-W as early as Monday, July 18. Immediately after luncheon the members of the party will go to Noke Farm, where they will be the guests of Mr. and Mrs. Charles Ward, who now own the house once the home of Nicholas Holt, one of Andover's early settlers.

Among those from out of town who expect to attend the meeting of the association are: Colonel Lucius Holt of West Point Military academy, president of the Holt Association of America; Mrs. Harriet Holt Perry of Montclair, N. J., secretary of the association; Frank L. Holt of New Jersey, a former president of the association; and Miss Clara Whitmore, chairman of the historical committee.

Nicholas Holt came from England to Boston in 1635 and after a short stay in Newbury came to Andover in 1644. His brother William crossed to America in 1683. Their descendants are legion, especially in this section, and any who are interested to join the pilgrimage are asked to communicate with Mrs. Frank Kendall.

Reorganize Holy Name Society; Barrett Elected 28th Term

The Holy Name society of St. Augustine's parish was reorganized at a meeting held in the basement of the church on Sunday evening. Following the roll call and a short address on the purpose of the society, given by Rev. Charles A. Branton, O. S. A., the officers for the ensuing year were elected. Patrick J. Barrett was unanimously elected president for the 28th consecutive period; William Doherty, secretary; and John Cussen, treasurer. The following board of trustees was also elected: Augustine P. Sullivan, John P. S. Doherty and Joseph A. McCarthy. It was voted at this meeting to hold a field day on Sunday, July 24, and the following committee was appointed from the chair to make the necessary arrangements in securing a park and also to take care of the transportation plans: Charles Hurley, John H. McDonald and John Cussen.

The following committee was appointed to arrange a program of sports: James Doherty, John Sweeney, William J. Doherty, John Nelligan, Edward Lefebvre, James Welch and William Collins.

Andover Garage Wins

The Andover Garage defeated the Elite Service Station Team in a hard fought game, played on the Ballardvale playstead Tuesday evening, by the score of 7 to 5. The lineup as follows: Andover Garage: Ronan, p.; O'Shea, c.; Wrigley, 1b.; McCoubrie, 2b.; Deyermann, s.s.; Morgan, 3b.; Bisbee, r.f.; Fallon, c.f.; Crowley, l.f. Elite Service Station: Hilton, p.; Long, c.; Garside, 1b.; L. Conkey, 2b.; Gallant, 3b.; Zechini, s.s.; Fuller, r.f.; G. Conkey, c.f.; H. Hilton, l.f.

Entertain Andover Scouts

A large delegation of Andover Boy Scouts were the guests of the Camp Manning Scouts at the camp at the south side of Pump's pond on Tuesday evening. The Andover boys went to the camp and participated in a "sham attack" to surprise the Manning boys with their appearance. Each troop planned its own form of attack. The following local troops were represented: Troops 2, 3, 6, 7, and 8. Nearly fifty boys have been registered at the camp during the past two weeks and another large number were expected to put in an appearance at the camp on Wednesday. The officials expected to have about eighty boys in camp by Wednesday night.

Camp Manning is conducted by the Malden council for Malden Scouts. Commander H. G. Copeland, a great favorite with the boys, is in charge. He is being assisted by Carl E. Taylor.

Ice Water Weather No Time for Washday

THESE sultry days, when everyone is drinking ice water and looking for a fan, are no days in which to do a week's washing.

Really it's a strain on your health to spend long hours in washing or ironing work during the heat of the summer. So, needless to say, the WESSELL Service should be taken advantage of now, as never before.

If you have never used it, try it this week. If you are using it, use it for a more complete service. You will always be pleased with the Wessell Service.

Modern Laundry WESSELL'S Telephone 22640 Successor to Gay's Laundry METHUEN, MASS.

Obituaries

MRS. WILLIAM H. CARTER Mrs. William H. Carter (Emma Thayer) passed on Sunday afternoon July 10, after an illness of a few weeks. It was a great shock to her family and friends who had thought that she would recover until a short time before she went.

Her loss is irreplaceable to her own for she was devoted to her family and was a homemaker and housewife; she gave and received unstinted affection, and created an atmosphere in her home not to be forgotten by those that were privileged to share it. She left a husband and five children, Mrs. Charles B. Starks, Miss Evelyn K., and Miss Irma A. Carter, of Andover, and Mrs. Lester N. Towne of Glens Falls, N. Y.; William H. Carter, Jr., of Glens Falls, N. Y.; who deeply appreciate the sympathy and kindness shown them by their friends and neighbors.

The services were held at the family home Wednesday afternoon, July 13. The burial was in Spring Grove Cemetery.

JANE SMITH Miss Jane Smith, a former resident of Andover, passed away last Friday afternoon at the O'Donnell Sanitarium, Ballardvale.

Deceased is survived by one brother, Alex Smith of Andover; three sisters, Mrs. William Sec of Whitesville, Mrs. James Smith of Andover, and Mrs. James Sec of Ballardvale.

The funeral was held from the home of her brother, Alex Smith of North Main street, Sunday afternoon at two o'clock. Interment was in the family lot in Spring Grove cemetery.

MRS. ANNIE (RYAN) POLGREEN Mrs. Annie (Ryan) Polgreen, wife of Aubrey, of 37 Washington avenue died suddenly Monday evening at the Snow sanitarium.

She was an active member and secretary of Court St. Monica, Catholic Daughters of America, and a devout member of St. Augustine's church.

Besides her husband she is survived by two sons, Aubrey and Alan; three daughters, Esther, Hazel and Sister Rita Alberta of the Order of Notre Dame; five sisters, Mrs. Albert Polgreen of Methuen; Mrs. P. J. Sullivan of Hartford, Conn.; Mrs. Thomas Condon of Naugatuck, Conn.; Mrs. Joseph Delaney of Ireland, and Mrs. David O'Neil of Australia; also a brother, Patrick Regan of Ireland.

Funeral services were held Thursday morning with a mass of requiem at 9:30 o'clock in St. Augustine's church. The mass was celebrated by Rev. Charles A. Branton, O. S. A. Rev. Charles A. Hart of St. Rita's church, Philadelphia, was seated within the altar rail. At the offertory, Leback's "Pie Jesu" was sung by Katherine A. Donovan. As the body was borne from the church, "Jesu Salvator Mundi" was rendered by Frank A. Robertson. Annie G. Donovan was the organist. Interment was in the family lot in the Immaculate Conception cemetery.

The bearers were: Albert Polgreen of Methuen, Stanley Proverb of Winchester, Clarence Polgreen of Somerville, Joseph Fallon, James Souter and Frank McDonald of Andover.

Andover Man to Visit Ireland

Michael Gardner, caretaker of the estate of Bartlett Hayes of this town, sailed for Ireland on Sunday, July 11, for a two months' stay with his mother.

Mr. Gardner is to receive a well-earned rest after twenty-two years' continuous service in the employ of Mr. Hayes. He is identified with Andover council, K. K. of St. Augustine's Holy Name society and Division No. 6, A. O. H.

Mr. Gardner was the host at a party tendered him last Friday evening at Wayside Inn, and received the well wishes of all present for a most delightful trip.

Natural History Society to Meet Next Tuesday

The next regular meeting of the Andover Natural History Society will be held next Tuesday evening at the Pynchard lecture room at eight o'clock.

A new president will be elected and plans will be discussed for the coming year. Members are asked to make an effort to be present and to be prepared to make some contribution to the evening's program.

Presented With Gifts

At nine o'clock Monday evening, Rev. and Mrs. Harold B. Williams were tendered a miscellaneous shower in the church vestry. It was a big surprise to them as they were greeted by a large gathering of members of the Willing Workers Society, the Methodist church and Young People's Union, all of whom gathered to give them a grand welcome and to bring tokens of esteem and friendship.

Volley Ball Game

The M. A. C. defeated the Whirlwinds on the playground by the scores of 15 to 12 and 15 to 4. The lineup for the teams are as follows: M. A. C., Carl Wells, Stillman Lawrence, Charles Nason, Fred Buckley, Burton Abbott, Edwin Brown.

NEW ADVERTISEMENTS

TO LET—A steam-heated furnished room with all conveniences. Apply 55 High St., Andover, Mass. WANTED—Girl or young woman, Protestant, for general work in a New Hampshire lake camp. Apply at once. "G", Townsman Office.

No Secular Pleasures on Puritan Sabbath

Driving on Sunday, even to church, was considered almost a crime in England by the stern Puritans in the Nineteenth century, in view of which the announcements that provision for a parking place has been made in the building of a new church at Southampton is particularly interesting.

Enjoy Birthday Party

Monday afternoon a delightful birthday party was held at the home of Mr. and Mrs. Ernest Stein, Andover street, in honor of the seventh birthday of their daughter, Esther.

Town Team Defeats Andover Garage

Monday evening the Ballardvale Town team defeated the Andover Garage on the local playground by the score of 9 to 2. Harry Trow pitched a fine game for the town team hitting 13 strikeouts and allowing only 4 hits.

Bible School to Open

A community Bible school in charge of the pastors of the Congregational and Methodist churches will open on July 18 and continue until August 5. Classes will be held with competent teachers in charge.

The Campers

Prof. Richard Souter, authority on natural history, having completed a most enjoyable stay with his friends, the Cheneyes, who are spending the summer in the Vale, has left to return to Florida where he makes his home.

Andover Savings Bank

The following pass book issued by the Andover Savings Bank has been lost and application has been made for the issuance of a duplicate book. Public notice of such application is hereby given in accordance with Section 40, Chapter 590, of the Acts of 1908.

Obituary

MISS JANE SMITH The funeral of Miss Jane Smith was held Sunday afternoon at the home of her brother on Main street, Andover, with Rev. Wesley G. Nicholson, pastor of the Ballardvale Congregational church, officiating.

Willing Workers Hear Officers' Reports

The monthly meeting of the Willing Workers' society of the Methodist church was held Monday evening in the church vestry with the president, Ben Nason, presiding.

Sarcophagus of Napoleon Paris

OSM.

In 1841, twenty years after Napoleon's death, his remains were brought to Paris and placed in the sarcophagus shown in the illustration, under the dome of the Hotel des Invalides. The sarcophagus is made of red Finland granite. It is thirteen feet long, six and one-half feet wide, fourteen and one-half feet high. It was designed by M. Monferrand and cost \$30,000.

We erect modern tombs at a moderate cost. We offer a wide range of designs, or will make a special design to your order. Our service is superior to any other to be found in this part of the country.

GLENNIE'S MILK PLANT IN NORTH ANDOVER IS LAST WORD IN SCIENTIFIC EQUIPMENT

First Dealer in This Section to Install a Pasteurization System—Continues to Keep Abreast of Nation's Leaders With Newest and Most Scientific Equipment in Every Branch of the Business

The last word in scientific equipment as regards the bottling of milk can be found at Glennie's Milk Plant in North Andover. Mr. Glennie has taken particular pride in leading this community by adding from time to time any new machinery which would enable him to give his customers the purest and finest quality of milk obtainable. The Glennie plant is located at 117 Massachusetts avenue in North Andover. It is open for your inspection at any time, and an invitation is extended by Mr. Glennie to visit his plant, particularly from 9.30 a.m. to 1.30 p.m. at which time all the plant is in operation and the best idea can be obtained of the cleanliness and care that goes into the bottling process.

Mr. Glennie has it to his credit, to be the first milk dealer in Greater Lawrence to install a pasteurization system. He has just added to his plant the latest sanitary bottle washer, of which there are less than a score in the State of Massachusetts, and

greatest care and cleanliness must be maintained in its handling to the door of the consumer. Milk has a food value that is a real body-builder and during hot weather it is the best diet to stick to; its use in other dishes makes it economical, and at the same time yields more strength than more expensive forms of foods.

Mr. Glennie believes more people should take the time to inspect the source of supply of most of their foods, and his invitation to inspect his plant at all times is conclusive proof that he is offering to the public and people of this community, a product that's worthy of all the effort he has put behind it, and his list of customers is a fitting endorsement of the quality, cleanliness and purity of his milk.

Fire Waste in New England

New England's prosperity is being steadily sapped by the continued high fire waste of its cities, figures prepared by the National Fire Protection Association prove. Statistics gathered from fire department officials show that in 63 New England cities the average fire loss last year was \$3.90 per person. This per capita loss, the Association explains, represents merely the value of property destroyed by fire, and does not take into account insurance costs, loss to business resulting from fires, or the loss to the communities that inevitably follows the destruction of industries and business houses.

The fire waste in New England is higher than in any other section, analysis shows. Massachusetts 38 cities of more than 20,000 had an average fire loss per capita of \$4.25, the highest of the 11 largest industrial states of the Union. The average for the 377 cities of the United States, having a population of 20,000 or over, was \$3.35.

Just as Massachusetts leads its sister states in fire waste so Boston leads the larger cities of the country, having a per capita loss in 1926 of \$6.59, and an average loss over a five-year period of \$6.45.

But Boston is by no means the only nor the chief offender in New England. Six other cities have a higher fire loss average for the past five years than Boston. These cities and their average annual fire loss over a five-year period follow: Peabody, Mass., \$9.33; Concord, N. H., \$7.71; Haverhill, \$7.15; and Chelsea, Mass., \$6.87.

The economic significance of this continued high fire loss throughout all New England cannot be evaded, the Association believes. The fire loss in New England is resulting in continued high insurance rates, for the rate of insurance is governed by the fire loss rate; it is tending to discourage industries from coming to New England, and

what is even more striking and discouraging it is sending industries from this section, for when a mill or factory burns, the tendency is to move that industry elsewhere, to a section where lower insurance rates prevail and where labor and living conditions are represented as being more favorable.

While New England continues to be the chief offender in piling up fire losses, the rest of the nation is not far behind. The estimated national fire loss for 1926 was \$570,000,000 and the number of deaths from fire was at least 12,000. And at least 75 per cent of these fires could have been prevented. This is the consensus of men who are devoting their lives to the study of the prevention of fires, and the protection of life and property from destruction.

To cut down this staggering loss has been the work of the Association during its 31 years. This has been done by creating standards of building, which reduce the susceptibility of destruction by fire, by educating the people through "fire prevention" weeks and other ways of the danger of operating with fire departments and local fire prevention agencies in their work in cities and towns throughout the nation. In order to extend this field service the Association is now at work creating a field service fund of \$500,000, which will be used to pay the salaries and expenses of ten field engineers for a period of five years. Boston and New England is raising \$50,000 of this sum,

which will insure the assignment of at least one engineer to New England during the coming five-year period for intense co-operation with cities of this section.

The most thorough method of eradicating avian tuberculosis (tuberculosis of fowls) is to slaughter the entire flock when indications point to an extensive outbreak. Fowls in good flesh, showing no lesions or slight ones, may be used for food. Badly diseased birds and all visceral organs should be destroyed. The chicken houses, enclosed runs, and all eating, drinking, and other utensils should be thoroughly cleaned and disinfected with a strong solution of such germicides as carbolic acid, cresol, or any of the recognized coal-tar preparations or dips. Carbolic acid may be used in 5 per cent solution, compound cresol in 3 per cent solution, and formaldehyde in the proportion of 1 part of commercial formalin to 10 parts of water. Ordinary quicklime is a good, cheap disinfectant for poultry yards.

Successful rabbit raising requires good stock and proper management. The American White, American Blue, New Zealand White, New Zealand Red, White Flemish, and Chinchilla rabbits are the varieties most extensively bred in the United States for meat and fur. Rabbits of these varieties are usually bred at from 7 or 8 months up to 4 years of age. Four litters a year are raised ordinarily.

AWARDED FIRST PRIZE

Mrs. William A. Trow of Lowell Street Exhibits Larkspur and Wins at Lawrence Garden Club

At the regular monthly meeting of the Lawrence Garden club held last Tuesday afternoon at the home of Mrs. Harry W. Clark of North Andover, Mrs. William A. Trow of Shawsheen Village was awarded first prize for the best single specimen of larkspur and Mrs. Louis A. Holt was the recipient of the prize for the best collection of larkspur grown in the gardens of Greater Lawrence. The madonna lilies entered in the contest by Mrs. William E. Twiss were adjudged the best of that species on display.

A paper on delphiniums and their cultivation, prepared by Miss Ruth B. Ely of North Andover, was read by Miss Lillian Wainwright, club secretary. During the afternoon the members of the club inspected the gardens about the Clark residence.

Tea was served by the hostess assisted by Mrs. A. M. Godfrey, Mrs. Warren Stevens, Miss Annie Sanborn, Mrs. William Trow, Mrs. Louis Holt and Miss Harriet Haller.

The club voted to visit the Crane estate in Ipswich on Friday.

Those planning to go will leave Lawrence about two o'clock, and meet on the green in Ipswich, proceeding from there to Watch Hill, the Crane Estate on Argilla road.

There will be an admission fee, but the beautiful gardens are well worth seeing. All club members wishing to go and lacking transportation are asked to notify Mrs. William J. Bradley at 89 Knox street, Lawrence.

Mrs. Trow's garden has long been noted for beautiful flowers and this year is no exception. For many years she was a leader in the Andover Flower show.

She was prominent among those who have been responsible for the success of the annual Farm-Garden Conference held by the November Club.

SUNDAY SCHOOL PICNIC

Joint Outing of Community and West Churches held at Wenham Park. Affair One of Best Ever Held

Over one hundred members of the Shawsheen Community and West church Sunday schools joined in their annual picnic at Pleasant Pond park, Wenham last Saturday. The day was ideal for the outing and the bathing beach was the most popular place in the park during the day.

The party left The Mall at nine o'clock in automobiles and from the arrival, shortly after ten o'clock, until noon games were enjoyed by the smaller children. After a basket lunch, sides were chosen for a baseball game and when the smoke had cleared away it was found that the scores had been swamped by runs and all count was lost.

The return trip was started about four-thirty with all who had attended, counting it as a most pleasant and enjoyable day.

Too Much to Expect

Angry policeman on point duty stopped the little car that had tried to sneak past his outstretched arm.

"Can't you see me?" he demanded of the driver.

"I—er—must confess I did," returned the motorist meekly.

"Then why didn't you stop?" asked the policeman, becoming more angry than ever.

"Well, I lost my head," explained the wrongdoer sadly. "I had just spent half an hour in getting this thing to start, and I thought it was a pity to stop her so soon."

Parting of the Ways

Reggie had been very rude to his father and had been sent to his bedroom as a punishment.

A little later his mother went to see what the boy was doing and found him writing.

"Is that a letter to daddy asking forgiveness?" she said.

"If you must know," replied Reggie. "I'm writing to the archbishop of Canterbury to get a divorce from both of you."—London Tit-Bits.

Some Long Trips

A motor car on a trip round the earth's equator would take about 17 days 8 hours, at a speed of 60 miles an hour. A little less than five years would cover the distance at the same speed round the sun. But to circle Antares, the largest known star, would take approximately 1,370 years, for the diameter of Antares is estimated at more than 273,000,000 miles, which is more than 300 times that of the sun.

System Failed

The mother looked weary. "Trying to be too efficient," she said. "I laid down the law that every member of the family was to be efficient. They were to look after all their own personal matters."

"If father's suit needed pressing he was to take it to the tailor's himself and he was to tramp to the laundry with his collars. Son was to put his own buttons on his shirts and keep his chiffonier in order. Daughter was to wash her own silk stockings, take her own shoes to the cobbler's."

"And so on, each member of the family was to do for himself. And why am I so weary? Because they all flunked it after the first day or two, and now I am putting in hurried hours trying to catch up with the things they left undone."—Springfield Union.

You rarely lose anything in Japan, according to American travelers. If you leave your pocketbook or camera on the train or in the street car, you will be sure to find them when you go to the proper place for lost articles.

Dr. Charles W. Elliot, late president emeritus of Harvard University, said, "The prime object of democracy is and ought to be increasing freedom, independence, comfort and exemption from fear for all sorts and conditions of men, but this object cannot be attained until the poverty due to political institutions or social customs has been abolished."

The Japanese tallow tree bears nuts containing a rich tallow-like oil that is very valuable and is used in the manufacture of high-grade varnishes. Experiments carried out in the lower Rio Grande Valley prove the tree can be grown there.

Modern Society Slow to Forgive Criminal

Can a criminal come back to society?

No. In all my experience I have never known a case of a thoroughly successful comeback, when a former criminal was allowed to take his place in society and be received into it. It is not so much the failure of Christianity as the fact that human nature and society have not reached the stage of enlightenment or willingness to accept the ex-criminal. Human nature and society, constituted as they are, are such as to prevent an absolute comeback, and this is more in evidence because of the fact that the modern teachers of Christianity have failed in their mission of forgiveness, and also because it is invariably found that those who profess deep faith and a Christ-like spirit are the first to shun and scorn the really conscientious, unfortunates, or innocent victims of circumstances, who are genuinely desirous of completely blotting out their hideous past by sincere service in the cause of humanity at large.

But everything is not lost. Many prison workers and deep students of criminology feel that a spirit of understanding will sooner or later overcome these obstacles in the way of the ex-criminal.—Theodore Dreiser in the Smoker's Companion.

Impaired Vision No Handicap to Genius

Strangely enough one of the world's great astronomers had such poor sight that he could not more than see the stars. He was John Kepler, a German, whose fame sprang from the discovery of these three astronomical laws:

That all the planets travel around the sun in elliptical orbits, with the sun at one of the foci.

That the radius sector joining each planet with the sun traverses equal areas of the plane of orbit in equal periods of time.

That the square of the time of revolution of each planet around the sun is proportional to the cube of the mean distance from that luminary.

To overcome the handicap of impaired vision, he obtained the services of Tycho Brahe, who was not a great reasoner, but an admirable observer. It was upon his perfect observations that Kepler, a master generalizer, reached his conclusions. His three laws are included in his book, "The New Astronomy," published in 1609 at Prague. He died 19 years later.—Kansas City Times.

Crude Oil Production in U. S.

NO. OF BARRELS

1922	557,531,000
1923	732,407,000
1924	713,940,000
1925	765,743,000
1926	766,504,000
*1927	864,000,000

*Based on rate of output for first four months.

*Based on the latest data available I estimate the daily average new supply of all petroleum for the month of May to be around 2,640,000 barrels. This figure includes our own production plus imports.

Now, the amount of gasoline sold in the necessary to supply current demand I estimate at approximately 2,530,000 barrels daily. These figures mean that our supply of all petroleum exceeds our demand by about 110,000 barrels each day.

The Real Losses

"It's an ill wind that blows nobody any good," while the oil operators are complaining of no profits and are taking their losses, the benefits of lower gasoline prices are being passed on to the consumer.

However, it must be admitted that the unnecessary expense of storing vast quantities of surplus oil for months or even years will eventually fall upon the consumers and that a large over-production and excessive storage is uneconomical and wasteful.

"To my mind, the greatest loss which will result from a condition like the present is the lack of incentive to inventions and processes which will produce a more economical use of the crude product. Over-production not only causes loss to stockholders, and wastes today what may be needed tomorrow, but it greatly hinders the development of new inventions and the utilization of known ones which will reduce costs and make for better utilization of crude oils. It is very possible that a considerable cause of the present over-production is the result of improved processes which have made possible the larger gasoline content derived from lower grade oils. However, so long as the supply of crude oil is increased without any regard for the market of that oil, refiners lack incentive to take full advantage of the least wasteful methods of production, thus causing a tremendous loss to the country.

The Probable Remedy

"Many remedies have been offered for the control of crude oil production and as many have fallen by the way side. Evidently Secretary Mellon believes that the inexorable law of supply and demand will have to take its toll in the industry this time just as it has in the past, and as it does in most other lines of industry. Much was expected from the Federal Oil Conservation Board which was formed by President Coolidge two years ago. Recent developments, however, show that this Board has no power to do anything but consult, and that the Government officially cannot take an active part in any way.

"Recent conferences between Dr. Work, Secretary of the Interior, and representatives of leading oil companies make it clear that

Courtship of Spiders

In the behaviors of courting spiders recognition and stimulation come into play in various degrees. The males, as in most animals great and small, despite Bernard Shaw, begin the cycle of events by an active search for the females. They recognize her finally by sight or smell or by a combination of these senses. The female recognizes them apparently by sight or by some tactile message, and when recognition has taken place, restrains her customary swift ferocity. According to the more recent authors, the antics and ornamentation are not an appeal to the esthetic sense of the females and do not, therefore, come into the theory of sexual selection.

First Electric Lights

Soon after the first electric light system was built in New York city in 1882 the idea of lighting by electricity became so popular that the shares of the Thomas A. Edison company, whose par value was \$100 were quoted at \$3.00. However, the new enterprise required a great deal of money. The cost of sinking cables underground along the streets was one of the heavy expenses. In those days many people insisted upon pole lines even though they did destroy the beauty of a street. Mr. Edison's pet remark to them was: "Why don't you lift water and gas pipes up on stilts too?"

YOUR BOY'S BUSINESS

THE OIL CRISIS

Babson Comments on the Oil Situation

Babson Park, Massachusetts, July 10, 1927. In view of the excessive rate of oil production, with its demoralizing effect on the industry, we have asked Mr. Babson to give us his views on the oil situation. This is his statement:

Peculiarities of Oil Industry

"Fundamentally, the oil industry is today in no different position than it always has been,—namely, that of unstable equilibrium. Owing to its very nature it is in a condition of unbalanced production a large part of the time. Despite the aid which geologists give in locating and estimating oil, the striking of oil and the flow of oil after it is found are a tremendous rate as it did in the California fields in 1923 and has recently increased in the Seminole district. The production of oil is a widely fluctuating quantity.

"In many commodities if the supply should be suddenly increased a reduction of price makes bigger sales and greater consumption. Thus a balance can be maintained between supply and demand through the regulation of price. If the cost of shoes should be suddenly lowered you would probably buy a new pair of shoes rather than have the old pair cobbled. Thus the demand for shoes can be largely controlled through the price of shoes. On the other hand, the amount of oil consumed is a relatively stable quantity. The amount of gasoline sold is not so dependent upon the price of gasoline as upon the number of cars in use. The amount of machinery in operation determines the lubricating oils consumed, and the weather determines the fuel oil burned.

"The advent and development of the automobile created tremendous demands for gasoline. This demand is still growing. We are just now entering an era of commercial aviation the development of which may be beyond our greatest dreams. This will open another big need for gasoline which may even over-top the automobile market. It was only a few years ago that the oil interests began to realize the possibilities of fuel oil for operating our industries and heating our homes. In most of our cities today but a small per cent of the homes are heated by oil, and experts state that we shall live to see the time when ninety per cent of our homes will be heated by oil, gas, or electricity. The use of oil for fuel in industrial plants is barely started. But is it fair to assume that all of the uses for oil are now known? May not other uses be discovered from year to year, of which we do not dream today? I believe they will, and that is one reason why I believe in the future of oil."

sooner or later some measures should be expected which will curb the drilling of new wells and restrict the supply more nearly in accordance with the demand. Such action, however, must come from the oil industry itself. The most that the Government can be expected to do is to take a liberal attitude in so far as the anti-trust laws are concerned. California, incidentally, which is dominated by big companies, has for some time practiced curtailment of drilling to regulate production. Here is the probable remedy, and the oil men appear to be coming to a common point of view in respect to control of new drilling.

"Thirty to forty years ago the entire business was shot to pieces and the producers were making no money. It was then that Mr. Rockefeller took a firm grasp of the situation, rehabilitated the industry and brought about consolidations which ultimately led to the formation of the Standard Oil Company. Although Mr. Rockefeller has been greatly abused, his command of the situation saved the industry. More than ever before, the oil industry today needs a Rockefeller to command the situation, effect necessary consolidations and to straighten out both the production and sale of oil.

The Future

"I believe that fundamentally the oil industry is as sound an industry as we have today. General business is in a healthy condition, the Babson chart registering 7 per cent above normal. This fact should help in its stabilization. True, at the present time the oil industry is down, but it is also true that the old law of supply and demand is getting in its work to limit production and may get ahead of any controlling organizations as far as the present crisis goes. Not only will there come a time of lessened production, but the underlying trend of consumption is steadily increasing, and the long outlook in the oil market is inevitably toward a higher level of prices.

"The advent and development of the automobile created tremendous demands for gasoline. This demand is still growing. We are just now entering an era of commercial aviation the development of which may be beyond our greatest dreams. This will open another big need for gasoline which may even over-top the automobile market. It was only a few years ago that the oil interests began to realize the possibilities of fuel oil for operating our industries and heating our homes. In most of our cities today but a small per cent of the homes are heated by oil, and experts state that we shall live to see the time when ninety per cent of our homes will be heated by oil, gas, or electricity. The use of oil for fuel in industrial plants is barely started. But is it fair to assume that all of the uses for oil are now known? May not other uses be discovered from year to year, of which we do not dream today? I believe they will, and that is one reason why I believe in the future of oil."

\$1000 To Be Awarded in VALUABLE PRIZES

CAN YOU SOLVE THIS PUZZLE?

FIRST PRIZE
A Beautiful \$700 Player **A Contest of Merit and Skill**

FIRST PRIZE

DIRECTIONS FOR SOLVING THE FAMOUS PUZZLE
Place the figure 7 in the center square, then place figures in each of the other squares so as to total 21 horizontally, perpendicularly and diagonally, using numbers from 1 to 12. Do not use the same number twice.

RULES GOVERNING THE AWARDING OF PRIZES No. 1

The prizes will be awarded by three representative business men of Lawrence, Mass., in the following manner:
The first prize will be awarded for the best solution of the above puzzle, taking into consideration correctness and neatness. Solutions can be made out on the newspaper or separate paper or in any unique form the contestant desires.
The second, third, fourth and fifth prizes to be awarded according to their respective merits. In the event of a tie, prizes alike and of the same value will be awarded to each of the tying contestants competing for the five prizes designated in this advertisement.
Solutions will be accepted up to and including Thursday, July 23. Said solutions to this puzzle may either be mailed or delivered in person to our store at 440 Essex St. on or before the closing date, Saturday, July 23.
Prizes will be awarded on Monday, July 25, the day following the closing of the contest, at our store 440 Essex St., at 10 A. M., and the names of the successful contestants will be published in the Lawrence, Haverhill and Lowell newspapers.
Remember this contest closes promptly at 6 P. M., on July 23, and no solutions received after that hour will be considered.
Useful and beautiful souvenirs will be presented to every contestant sending us their solutions to this puzzle.

FIRST PRIZE
\$700 Elegant New Player Piano

SECOND PRIZE
Beautiful New Radio Set

THIRD PRIZE
Lady's Fine Diamond Ring

FOURTH PRIZE
Lady's or Gent's Wrist Watch

FIFTH PRIZE
Elegant Chest of Silverware

LORD PIANO COMPANY, 440 Essex St., Lawrence, Mass.

Talleyrand and Burr

After James Buchanan gave up his post as minister to Russia in 1833 he made a brief sojourn at Paris before returning to America. In the French capital he was introduced to the famous Prince Talleyrand, then in his eighty-fourth year. The aged diplomat, after asking a number of questions about America, inquired particularly about the family of Alexander Hamilton. He told Buchanan that when he was French minister for foreign affairs Aaron Burr came to Paris and sent his card to him. He returned the card with a message that he had the portrait of Hamilton in his parlor. It will be recalled that when Talleyrand was an exile from France he came to America where he met Hamilton. At that time he came to the conclusion that Hamilton was the greatest of all the Americans he had the pleasure of meeting.

Courtship of Spiders

In the behaviors of courting spiders recognition and stimulation come into play in various degrees. The males, as in most animals great and small, despite Bernard Shaw, begin the cycle of events by an active search for the females. They recognize her finally by sight or smell or by a combination of these senses. The female recognizes them apparently by sight or by some tactile message, and when recognition has taken place, restrains her customary swift ferocity. According to the more recent authors, the antics and ornamentation are not an appeal to the esthetic sense of the females and do not, therefore, come into the theory of sexual selection.

First Electric Lights

Soon after the first electric light system was built in New York city in 1882 the idea of lighting by electricity became so popular that the shares of the Thomas A. Edison company, whose par value was \$100 were quoted at \$3.00. However, the new enterprise required a great deal of money. The cost of sinking cables underground along the streets was one of the heavy expenses. In those days many people insisted upon pole lines even though they did destroy the beauty of a street. Mr. Edison's pet remark to them was: "Why don't you lift water and gas pipes up on stilts too?"

The NORTHWESTERN MUTUAL LIFE has \$3,303,842,471 of ins. in force; 7th in size out of 365 companies.

FOR HOT WEATHER

a real electric fan is a necessity. By a real electric fan we mean a General Electric oscillating fan—the one with the guarantee.

With reasonable care a G-E fan will last a life time.

In the sick room, during the hot summer weather, an electric fan is almost as essential as the doctor.

Easy terms for payment and priced as low as \$3.95.
