November Club

The Young People's Fellowship is planning to tis annual Epiphany candlelight service, to be held in Christ church Sunday night, at 7.30 To o'clock. The candles which are given to the congregation and are carried lighted out into the world outside the building represent the gospel borne everywhere. This year Rev. Barrett P. Tyler, D.D., a very interesting speaker, will give the address. He was formerly rector of All Saints, Brookline, and now is warden of St. Michael's Mission School for the Arapahos in Ethiete, Wyoning. The People in general are cordially invited to come. Mr. Newall will be at the organ and the choir will sing.

Island of Tavalora Has Two-and-Half-Mile Area

Iwo-and-Half-Mile Area Considerable confusion exists over the question of just what is the small-est republic in the world. Newspapers and magazines have mentioned both Andorra and San Marino in this con-Andorra and San Marino in this connection. As a matter of fact to neither
of these does the honor of being the
most diminutive belong. Andorra has
not been a republic for centuries, and
the fact that this country in the
Pyrenees mountains on the FrancoSpanish border has 191 square miles
in contrast to San Marino's 38 certainly puts it out of the running.

But even San Marino is eclipsed by
another Italian state, the Island of
Tavalora, which is off the north coast
of Sardinia and which has an area of

of Sardinia and which has an area of but two and a half miles. Tavalora's independence has not been uninter-rupted, but its beginnings go back to Roman days when it was used as a concentration camp for seditious glad-lators. The people on this isle still iators. The people on this isle still speak Latin, with their pronouncia-tion aided by German scholars some

tion aided by German scholars some 75 years ago.

During the years 1836 to 1886 the island was not independent, being owned by the Bartoleoni family—a gift of King Carlo Alberto. In the latter year the rights of this family were contested and Tavalora regained her freedom, promptly electing a president and six councilmen who govern the 100 people of the Island without pay.

A tie through Charle agne exists between the two states of Andorra and San Marino, for it was in the year of 802 when Charlemagne granted the state in the Pyrenees her indeper-ence. San Marino declared war on ence, San Marino declared war on that mighty monarch; "The latter's Latin secretary reported that the ruler died without learning the location of the state which declared war on him. —Pathinder Magazine.

Famous Pipers Honored

With Monolith and Cairn With Monolith and Cairn
A monument to the family of Maccrimmons has been erected on Skye,
the largest island of the Inner Hebrides. Scotland. The Scotsman of Edinburgh relates why the Maccrimmons
family should be thus honored;
"The Maccrimmons were the most
famous of all Highlanders as composers, players and teachers of bagpipe
music, and their college of piping in
Skye, which is now a ruin, was at
one time attended by 200 pipers."
Moreover, for 200 years it has al-

Skye, which is now a ruin, was at one time attended by 200 pipers."

Moreover, for 200 years it has always been a Macerlumon who has led the Senforth Highlanders on which they figured—at Waterloo in 1815, and at the relief of Lucknow in 1857, and at a lot of other places. The unveiling ceremony was performed by the MacLeod of MacLeod, the veteran chief of the clan of that name, to whose family at Dunvegan castle the Macerlumons were hereditary pipers for more than 300 years. There were actually two memorials unveiled: one a monolith, the other a cairn, which occupies a position 200 feet above Loch Dunvegan and near the site of the old college of pipers, with this inscription in Gaelie:

"The memorial cairn to the Macerlumos to properations."

Inscription in Gaelic:
"The memorial cairn to the Mac-crimmons, of whom ten generations were the hereditary pipers of Mac-Leod, and who were renowned as com-posers, performers and instructors of the classical music of the bagpipe. Near this spot stood the Maccrimmons

Moons of Planets

Moons of Finance
Jupiter has four large and five small
satellites; Saturn has ten, while Mars
has but two, so far as discovered.
Each of the planets may have moons
not yet identified. One of the first
discoveries made by Gallieo with his
crude telescope, early in the Seventeenth century, was that Jupiter had
four moons. When Gallieo reported
his discovery few people believed it.
One scientist refused to even look
through Gallieo's scope. He died soon
after and Gallieo's scope. He died soon
after and Gallieo's marked that he
hoped this skeptic had seen those
moons on his way to heaven. It was
not till nearly three centuries later,
in 1892, that the other moons of Jupiter were found. Huyghens, the Dutch
astronomer, discovered the first of Saturn's moons, in 1655, while the tenth
was found in 1905. Nearly all the discoveries of these small moons have
been made in the United States, as
we possess the largest telescopes.—
Pathfinder Magazine. Jupiter has four large and five small

Meteors Small Particles

Meteors Small Particles

of Either Stone or Iron

Meteors are known to be small particles of matter composed either of
stone or iron or both. About 30 other
minerals have been identified in some
of them, says a writer in the Kansas
City Times. Even miscroscopic diamonds have been found in a few meteorites that have struck the earth. The orites that have struck the earth. The meteors we see are too small to be observed in space and are therefore observed in space and are therefore not visible until they encounter the earth's atmosphere, when, because of the tremendous speed at which they travel, friction causes them to burn brightly. It is the light from their burning that we see. They are usually consumed in less than a second of time, and are often followed by a stream of "smoke" which lingers for several seconds after the meteor itself has been spent, Ordinarily they appear about around 75 miles above the earth and disappear at about 50.

Usually, those meteors appearing in the evening hours (overtaking the earth) are estimated to travel at a

the evening hours (overtaking the earth) are estimated to travel at a speed of 7 to 14 miles a second, while those appearing about dawn (and meeting the earth head-on) are rated at a speed of 44 to 51 miles a second. Thus the evening meteors are usually more brilliant and come pearer to the earth, while those of the morning are more numerous and their enormous speed burns them up at a much greater height.

r height.
It happens sometimes that large meteors are not consumed in flight and therefore strike the earth. These and therefore strike the earth. These are called meteorites and are divided into three many into three main classes, stone, stony-iron and iron,

Fossil Ant Emphasizes

Fact They Are Very Old
The discovery of a "living fossil"
at in Australia emphasizes anew
we venerableness of the ant family. the venerableness of the ant family. Ants are so old that their evolution had been completed before man appeared. One hundred million years ago they had developed a social order which might well have served as a model for man's. And three hundred million years is estimated to be the length of time they have existed, says a writer in the St. Louis Globe-Demogration.

a writer in the St. Louis Globe-Democrat.

The "living fossil" found by the Australian National museum is said to be more primitive in structure than any other of the 3,500 known living species of ants. It has been put in the group known paradoxically as "living fossils" because it resembles a species which was thought to have become extinct thousands of years ago.

The characteristics of some of the oldest ants happen to have been preserved perfectly, because millions of

oldest ants happen to have been preserved perfectly, because millions of
years ago the ants fell into resin and
were sealed there while the resin forsellized and became what we know as
amber. The scientist today can study
"helf structure minutely, and he can
also determine when they lived by ascertaining the age of the amber. Bacon
speaks of these "ants entombed and
preserved forever in amber, a more
than royal tomb."

But most can be learned of ants,
both living and extinct, by following

Chameleon's Colors
It has been said that no one knows the natural color of the chameleon, for one specimen may appear in half-a-dozen different dresses in as many days. If we place it on a green background, it soon becomes a similar green; remove it to a dark brown, and before many hours have passed it will correspond with its new surit will correspond with its new sur-roundings. Many experiments have ses this quick-change artist can for after many months of study. and when one innumber of the wardrobe, it suddenly appears in an entirely new creation. If different colored light is focused on to each side of the chameleon, each side will take on that particular color, while in the dark is takes on a cream coat.

The sap, ... fight in him. Mamma's boy! On, ... like to wring his neck. It was waiting for her in the living room, "I'm sorry you won't reconsider and sleep on the beach. We could talk it over in the morning."

"Oh, you spat Agnes. "I wouldn't stay within a mile of you, beginned, spolled.

Indians and Traders

When the White Man came to America he found the Indians living In tepees, gaining their existence from the forest primeval. In a limited way, they bartered among themselves and between tribes, but for the most part families were self-sustaining. The braves hunted and fished, perhaps grew some corn. The squaws ground the corn between stones and made flour. But the White Man brought with him those fire-spitting guns and gunpowder, colored cloth, sugar, and other goods which the Indians soon saw and wanted. Barter brought the desired results. With skins, furs, hides, fish, tobacco, the Redskin could go to the trading post and exchange them for beads, guns, and all kinds of desirable objects and materials.

desired results. With skins, furs, hides, fish, tobacco, the Redskin could go to the trading post and exchange them for heads, guns, and all kinds of desirable objects and materials.

Napoleon's Lucky Star

Everyone knows about Napoleon's belief in his lucky star, and how he communicated that sure faith to his armies and also to his enemies. He once actually said: "It is a great proof of the weakness of the human intelect that people should imagine they can resist me." It was, of course, one of the great factors in his career, His own brilliant strategy and genius and the mistakes of his enemies did not contribute more to the victories of Napoleon than did the steadfast faith so generally held in his lucky star which could not fail.

"I didn't think you could get it started, dean." he said. "You see, I opened the tank. and your gas has all run away."

For a moment they stood staring at each other. Then suddenly, they were in each other. Then suddenly the each other. Then suddenly the each other's arms.

"But. Peter, dear. We can't was a "I sub suddenly the each other's arms.

"But. Peter, dear. We can't was a

tled herself behind the wheel with an air of indignant finality.
And that's that, she thought—out of a Job, no money to get back home, stuck in Florida with only one friend in the whole darned state, and that's life! Being Agnes, she gave a mental dip of her skirts to the whole foolish proceeding, and turned the car's nose south toward the cabbage palm deso-inted island where that one friend had a tiny cottage; where she knew she could get shelter, food, sympathy and a good cussing out.

could get shelter, food, sympathy and a good cussing out.
Oh, yes, she'd been a fool to stay in Florida after having that fight with Peter, and giving him back his ring and refusing the marriage license, Might have known Jobs didn't last forever—not even good Jobs. Peter was the wise boy. He'd gone home and was now rolling in the sugar-coated luxury provided by that wealthy, silly mother who had been the cause of their disagreement. She hated that mother! She hated Peter!
She swept on at fifty miles an hour.

mother! She hated Peter!
She swept on at fifty miles an hour.
She should have telephoned Lillan, but
Lillan had no telephone. And a wire
would get there in the morning—Agnes
herself in two hours.
It was well after dark when Agnes
reached the narrow bridge connecting
the mainland with the Island. And as
she had thought possible. Lillan's
house was dark. But she parked the
car out on the road. She found, also
as she had expected, that the door was
unlocked.
She switched on a light and locked.

as she had expected, that the door was unlocked.

She switched on a light and looked about. The room had that upset alrof having been lately left. Lillan, in all probability, was somewhere playing bridge, or down at the beach taking a moonlight swim.

Lillan's bed was broad and looked comfortable, "Lillan may be surprised, I hope not unplensantly," she murmured to herself, and took off her freek.

frock.

The light was scarcely out when Agnes, being Agnes, troubles and all, was sound asleep. She woke with a certain feeling of vagueness. The overhead light was shining brightly in her eyes, Oh, yes, of course, Lillan, . . . She turned over and looked—at a tall, brown-skinned, burnt-blond vanng man with [renden]ly smiling

eyes.

"Mamma's darling boy just dropped from his nice new shiny airplane as a little midnight surprise." Agnes managed to drawl.

"And doth the burnt bride returneth the bridegroom?" saturned Peter pleasantly. "Cloying, as usual." Agnes came back smoothly, "But you'd better find your airplane and go back to mamma. I'm sure Lilian will be annoyed. She

doesn't like midnight visitors-unan "Oh, as long as it's you," said Peter, unexpectedly, "I'm sure she wouldn't mind, but you see, she's gone to the east coast with some friends for the

week-end . . ."
"Oooh." breathed Agnes, her aplomb

noticeably shaken.
"And she turned the shack over to me-for the sunshine and all. see before you the wreck of a pneu-monia victim—recuperating."

But Agnes, now thoroughly awake and herself, which meant poised to the point of pugnacity, sat upright in bed and spoke firmly.

"Peter Bennett, you get right out of this room. If you don't, I'm getting up

anyway, and I'm dressing and leaving here immediately. What do you mean by putting me in a position like this?" "Splendid. Agnes. great! I'll leave.

living room."

Peter went out, and Agnes dressed.

'Oh. you . " spat Agnes. "I uldn't stay within a mile of you. u're spineless, weak-brained, spoiled. I told you so before. You still are.

still are."

She flung herself out of the door.

She heard Peter laugh. "Good-by," he called.

She stepped on the starter. An angry growl was her only answer. The sweet purr of the motor remained dead. She stamped harder. She kicked. But all to no avail. The car wouldn't start.

But all to be start.

She opened the door to get out. Peter was standing there, still smiling, in the monolight.

"I didn't think you could get it started, dear." he said. "You see, I opened to be some gas has all run

Leaf-Fish Easily Fools

His Prey to Get a Meal

His Prey to Get a Meal
The leaf-fish, Monocirrhus polyacanthus, from South America, is of a dull brown color and has a remarkable resemblance to a dead leaf. They are found at home in the still backwaters of the tributaries of the Amazon and collectors have reported that it is necessary to examine hundreds of drifting dead leaves before finding one that turns out to be a leaf-fish.
They eat smaller fish and their method of feeding is one of the most interesting of all tropical fish. When searching for a meal the leaf-fish drifts slowly through the water, his head pointed down and his tail toward the surface. When he sees a small fish he gives no sign of elation, but dides patiently toward his victim.
The smaller fish is seldom alarmed

Idles patiently toward his victim.

The smaller fish is seldom alarmed by what he must think is just another drifting dead leaf. When the hunter has drifted close enough to make a strike he gently raises his head to the necessary position and with lightning quickness opens his cavernous mouth, into which the smaller fish disappears. Then the leaf-fish resumes his listless wandering.

Then the leaf-fish resumes his listless wandering.

When a pair of leaf-fish are ready to spawn they select a suitable site, usually along the underside of a stem or the leaf of a water plant. This is cleaned of all dirt and sediment with vertically along the selection of the s meticulous care. Then the eggs are attached to the underside of the leaf, each egg being suspended by a thread-like filament.

like filament.

After the eggs have been attached to the leaf one of the parents takes up a position near the eggs and proceeds to fan them by a brisk motion of the pectoral fins. This procedure causes a steady current of water to flow over the eggs and makes them sway back and forth, it provides aeration and removes any sediment that might collect on the eggs.

Word "Acre" Used Plural

When Referring to Lands When Referring to Lanus
The word acre has been used by modern writers, particularly in the plural,
for lands, fields, and landed estates.
We speak of broad or woody acres.
We speak also of God's acre when we
refer to a burial ground.
Etymologically, acre has been traced
to Anglo-Saxon occer, open country,

to Anglo-Saxon oecer, open country, forest, or untenanted land. With the forest, or untenanted land. With the development of agriculture, the term was used to designate (1) land used for pasture; (2) tilled land; (3) an enclosed or defined piece of land; a field without limitation of size; (4) a piece of land of definite size; hence, a land measure. Since 975 the meaning "a piece of tilled or arable land" has been in use. Therefore, in the expression "150 acres of land," the words "of land" are not necessary. The use of the words "of land" with acre has probably been due to the fact that some other word has intervened, as, "ten acres of arable land"; "five acres of wood land"; "an acre of barren land," etc., all expressions that have come down to us from Tudor time. In loose usage, acres has been applied to other things. For example, in 1830 the phrase "a few acres of real lace" was used by General Thompson in a book on "Exercises"; and in 1865 Carjae, in his "life of Frederick the Great," refers to his subject as having written "acres of despatches to Prince Eugene," Such loose usage is not accepted as correct, and phrases like "an acre of wood in length," and development of agriculture, the

not accepted as correct, and phrases like "an acre of wood in length," and "one acre in breadth" are merely extracts from Domesday Book .- Literary

Peppermint and Spearmint

Peppermint and Spearmint are grown for their essential oils, and peppermint, to a limited extent, as a dried herb, Commercial mint culture in the United States began more than 100 years ago in Wayne county, York. The growing of mint declined rapidly when large areas of fertile muck land in Michigan and Indiana were found to be well adapted for this crop. More recently certain areas this crop. More recently certain areas in western Washington, Oregon and California, where the conditions for mint growing are more favorable than in New York, have also developed the industry on a commercial basis. Mint oils are used extensively in numerous medicinal products, but principally for flavoring candies, chewing gum and toothpastes.

Tonnage

Tonnage is the world-wide shipping standard upon which dock dues, pilotage, insurance and the like may be calculated. Originally the term was "tunnage" (the words "tun" or "ton" are of common origin), and it was based on the number of tons of wine a ship could carry. Now tonnage is calculated on the cubic capacity of the entire hull, the net tonnage being arrived at by the assumption—after engine rooms, crew's quarters, after engine rooms, crew's quarters, etc., have been allowed for—that each 100 cubic feet of space is the equivalent of one ton of cargo—in the case of warships the tonnage is based on the amount of water displaced by the ship's hull.

The Eskimos

Very little is known about the origin of the Eskimo race. Even the word Eskimo is not their own but was bestowed upon them by their Indian neighbors south of the Arctic circle. For a long time they were regarded as Mongolian stock who had in some way crossed the ocean, possibly near Bering strait. But many anthropologists regard them as one kind of North American Indian, possibly one of the oldest of the Indian races.

children to use the town library in person, privilege that they could otherwise very seldom enjoy, and which they appreciate to the point of rapture.

Of the books borrowed this year, 21% were taken from the junior room, 1152 children have cards, and many parents and teachers avail themselves of its excellent selection of books.

We have again tried to let no shadow of depression or worry touch the children. They have had their celebrations of various anniversaries, their full share of new books, and at all times the room has been pleasant with gay posters, plants and flowers. Just lately, the arrival of an aquarium with gold fish caused special pleasure.

At Ballardvale there has been a 5% increase in use, and much appreciation has been expressed over a larger number of new books bought for the branch library.

Care in selecting books has always been an attribute of this library, but it seems as though never before have people been so openly appreciative of those chosen, nor have gone so out of their way to tell us how much they value those added to our shelves. It is true that they are buying fewer books for themselves, and so depend more upon the library. Perhaps this is to our advantage, since many realize for the first time, how surprisingly adequate and comprehensives our collection. We have taken pains to buy immediately publications concerning important new economic theories and developments, and have been gratified at the demand instantly resulting for these books. With business and government conditions shifting daily, some volumes of course are of temporary interest, but their purchase is justified because the interest for the time being, is so keen. The public, as individuals, is certainly becoming interested in economic affairs and in international relations.

Another point in our policy of book buying

"Damaged Lives" to Be Shown Here Next Week

One of the outstanding motion pictures of the past decade has been promised in "Damaged Lives" which will be featured at the local Colonial theatre on Tuesday, Wednessday, and Thursday of next week. While the story is based on one of the so-called "social diseases," and is frankly educational in the last analysis, this fact in no way detracts from the dramatic entertainment value of the proceedings. The dramatic entertainment value of the proceedings of the commenting on the picture recently, William F. Snow, general director of the American Social Hygiene association, said:

health professions.

"I agree with many who believe that this picture, and its accompanying film talk on 'Science and Modern Medicine,' should be shown to all young people as well as to parents. The endorsement by the National Board of Review of Motion Pictures, and the sponsorship of the American Social Hygiene association will give added assurance that this is an unusual and authentic educational effort in which the public should lose no opportunity to cooperate."

Girls' Basketball to Start at Guild

where it has given pleasure to so many and such different kinds of people. This fall we are plentifully supplied with potted plants, some of which have grown too large for house decoration, and others which are merely spending the winter with us during the absence of their owners from town. We also thank those who have remembered us with gifts of books. These are always appreciated.

For the past few months the reading-room is somewhat less of a refuge for the unemployed, but the increase in the number of books borrowed seems to indicate that its frequenters have been transformed into borrowers. In many instances, we know this to be the case.

Besides the usual school reference work there have been numerous questions for ideas or material to help in getting work or in preparing for better positions when they shall open. But the greatest service we have probably rendered is the relief and mental distraction afforded by reading. No one whas not personally been at the charging desh and given out books day after day, can possibly readize what free books from a free town library actually mean to people during an economic crisis such as this. Some of their

Without Heat as **Electricity Goes**

A little excitement and a great deal of discomfort were experienced by the residents of Canterbury street in Shawsheen village Monday night and Tuesday morning.

Soon after the electric light service went out of commission Monday evening the pole at the corner of Canterbury street was discovered in a blaze. The fire department was summoned and quickly extinguished this slight conflagration but the discomforts were not so easily disposed of A great many of the residents have oil burners with electric motors and consequently were without heat in their homes until Tuesday noon. One optimist in the group was glad that this did not happen when the temperature was twenty-eight below.

Drum Corps Buys New Instruments

Hogmanay Party

The annual Hogmanay party of Clan Johnston and its auxiliary in the Guild last Saturday night drew a large attendance. The music was furnished by the Hill Billies'

orchestra.

The committee follows: Alfred R. Harris, chairman; John Greenhow, Robert Dobbie, Thomas W. Neil, George B. Petrie, Edward Downs, Mrs. Hugh McLay, Mrs. George Nicoll, Mrs. George B. Carmichael, Mrs. Alexander Bertram, Mrs. Alexander Meek, Mrs. Robert Dobbie, Mrs. Jean Wood and Mrs. Hector Pattullo.

The regular meeting of the Pythian Sisters will be held Monday evening. A penny social will be held following the meeting.

There will also be a joint meeting of the social committee of the Knights of Pythias and Pythian Sisters on Monday evening.

New Year's Church Service Well Attended

A New Year's service lasting from nine clock until midnight Sunday evening at the aprist church was very well attended. The hilathea class served refreshments, and a roup from the girls' choir took part in a andle light pageant entitled "Live It hrough" arough."
The Woman's Union of the Baptist church

The Woman's Union of the Baptist church held its annual Christmas party Thursday at the home of Mrs. Everett M. Lundgren, IR Elm street. The Philathea, class Christmas party will be held this evening at eight o'clock at the home of Mrs. Colver J. Stone, 1 Locke street. The mid-week meeting Wednesday evening was held at 7.45 with Mrs. Harvey H. Bacon on Maple avenue.

Clan Auxiliary Has

The annual New Year's party of the Clan Auxiliary was held last night in Fraternal hall with about 100 present. Members of the Clan were guests. The party followed the regular meeting of the auxiliary.

A supper was served during the evening with the social committee headed by Mrs. Hugh McLay in charge, Solos were rendered by Mrs. Alfred R. Harris, Mrs. John Souter, and Mrs. Charles Valentine. Greenland's Icebergs

The great lee cap that covers all but a small coastal strip of Greenland to an estimated depth of 5,000 feet is responsible for leebergs. As the great glaclers that form the cap move down into the sea they break off at weak points and pleces float off into Baffin bay and Davis strait. Thousands of these are sent out from Greenland's ley mountains each year, but the greater part of them are grounded on the shores of Labrador and Newfoundland or are melted by erosion.

"Poor little Daisy, though I'm nervous enough over it, goodness knows."

"Poor little Daisy, was a rather autiful young woman of twenty-five, who lived alone with her bachelor sister, some ten years her senior.

"You'll just have to have the meeting," Mrs. Henry Jones, the president of the club, insisted, "unless, of course, it is physically impossible. Every one is expecting to have theartical charades—going to have theartical charades—go double doors and the large drawing room."

Toom."

Dalsy appeared rather pale and list-less that evening, while Mabel, who was clearly excited, showed cheeks that flamed with color.

The charades progressed smoothly enough, the members of the club dividing themselves into four groups, each one of which presented some distinguished actor, living or dead. The group of which Mrs. Jones was leader had chosen Richard Mansfield. "Rich" was easy enough, and "ard" would be rendered by a Cockney Englishman trying to say hard. For the last name, "field" was comparatively easy, and for the first syllable they would just need a man's hat or coat.

an Auxiliary Has

The charade was entirely successful. True, Mahel looked surprised when Mrs. Jones appeared in a derby and ulster. "I wonder where she got the man's hat and coat?" she said, which was her the always her she club, she needed to which gave her the clue she needed to

guessing the charade.

It was some minutes after the last guest had departed, and Mabel and Dalsy were straightening up before going to bed. Daisy had just come upon the derby and ulster when the telephone called Mabel.

"I'm awfully sorry," came Mrs. Jones' voice, "but I forgot to return the man's hat and coat I borrowed. I got them at the house just beyond Professor Barnes. Would you mind seeing that they get back?" And she hung up.

"The house beyond the Barnes," Mabel repeated, looking blankly into the receiver, "Why, Dalsy—that hat and coat—they must belong to—to—""Nut to "Load Balley were seen."

"Not to-" and Daisy went even paler than she had been the rest of

paler than she had been the rest of the evening.

After Mabel had made Daisy take a cup of black coffee they talked the matter over. First Mabel insisted that she would go alone, and then it was agreed that it would look better if they went together. There was hardly a chance that "he" would come to the door.

But "he" did come to the door—Hunter James Corbett himself, "Your hat and ulster," Mabel said, "Oh, we hardly expected to see you," said Dalsy.

Mabel was protesting. But somehow Hunter Corbett contrived to get his neighbors into the living room. And in a marvelously short time, considering, he had persuaded Mabel as well as Daisy that he hadn't really been to blame at all, Daisy and he had been engaged, four years ago, and then there was a misunderstanding. Then he went away and had not written because he thought Dalsy loved some one else. He had come back that day for the first time in four
