# address bar vs search box

# tabs

# Browser tip #1

## **Accidentally closed a browser tab?**

Right-click on the browser's title bar and click "Reopen closed tab."

## **Accidentally closed a browser window?**

Right-click the title bar and click "Reopen closed window."

# Browser tip #2

Open a set of web pages at the same time every time you start your browser.

Option 1: see <https://www.groovypost.com/howto/open-same-set-of-web-pages-every-time-start-browser/> for steps.

Option 2: Pinned tabs.

# Useful keystroke combinations

Keyboard shortcut	action

F5	Refresh
Ctrl-F5 or Shift-F5	Hard refresh (refresh and reset the browser cache for the current page)
Spacebar / Shift-Spacebar	Scroll down/up
F3 or Ctrl-F	Find text on the current page
F11	Toggle fullscreen mode
Alt-Left arrow / Alt-Right arrow	Go back / forward in browser history
Ctrl++ / Ctrl-- / Ctrl-0	Resize / reset zoom or text size

# Browser tip #3

Press and hold the browser's Back button to go back to a specific page in your browser's history.

# Browser tip #4

## **Synchronize bookmarks**

Different devices, same browser:  
Use built-in sync function (requires sign-in)

Different devices, different browsers:  
xBrowserSync, [raindrop.io](https://raindrop.io)

# Browser tip #5

## Bookmark tags

1. Tag a bookmark in Bookmark manager
2. Type tag in address bar to go to that site instantly

Native to Firefox; other browsers may require an extension

# Browser tip #6

## Use extensions / add-ons

- uBlock Origin
- Library Extension
- Honey

# Browser tip #7

## Show passwords hidden by asterisks

1. Right-click the password field and choose Inspect.
2. In the HTML editor, look for **input type="password"** and change it to **input type="text"** and hit Enter.
